*Abstract:* Owners and operators of affected facilities are required to comply with reporting and record-keeping requirements for the general provisions of 40 CFR part 63, subpart A, as well as for the specific requirements at 40 CFR part 63, subpart TTTTT. This includes submitting initial notification reports, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

*Form Numbers:* None.

*Respondents/affected entities:* Primary Magnesium Refining Facilities  
*Respondent's obligation to respond:* Mandatory (40 CFR part 63, subpart TTTTT).

*Estimated number of respondents:* 1 (total).

*Frequency of response:* Initially, occasionally and semiannually.

*Total estimated burden:* 611 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$62,700 (per year), which includes \$1,200 in annualized capital/startup and/or operation & maintenance costs.

*Changes in the Estimates:* There is no change in burden hours in this ICR from the previous ICR because the regulations have not changed, and are not expected to change, in the next three years. There is, however, a small adjustment increase in the estimated labor costs as due to an update in labor rates.
