NCSES’s current data collection instruments and processes and to reduce respondent burden, as well as to develop new surveys and new or improved data dissemination tools. Qualitative methods include, but are not limited to expert review; exploratory, cognitive, and usability interviews; focus groups; and respondent debriefings. Cognitive and usability interviews may include the use of scenarios, paraphrasing, card sorts, vignette classifications, and rating tasks. Quantitative methods include, but are not limited to, telephone surveys; behavior coding, split panel tests, and field tests.

Estimate of Burden. NCSES estimates that a total reporting and recordkeeping burden of 11,180 hours will result from activities to improve its surveys. The calculation is shown in Table 1.
