Standard No. 101 *Controls and Displays*: Replacement of the original instrument cluster with the U.S. model component and reprogramming the associated software as described in the petition. Inspection of each vehicle, and replacement of the cruise control lever with the U.S.-model component if required for the vehicle to conform to the standard.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment*: Replacement of the front and rear turn signal and side marker lamps, headlamps, taillamps, stop lamps, and backup lamps with U.S.-conforming components.

Standard No. 208 *Occupant Crash Protection*: The petitioner states that the passive restraint systems of the international specification vehicles comply with the requirements of this standard and are identical to the U.S. version with respect to all aspects of this standard, except for the passenger sun visor and dash mounted air bag warning labels. The petitioner also states that all software used to control the occupant crash protection systems bears the U.S. program codes and all hardware parts bear the U.S. part numbers.

Standard No. 225 *Child Restraint Anchorage Systems*: Installation of U.S. model anchorages and labels.
