 collection of information on those who
 are to respond, including through the
 use of appropriate automated collection
 techniques or other forms of information
 technology, e.g., permitting electronic
 submission of responses.

This notice also lists the following
 information:

Title of Proposal: Family Self-
 Sufficiency (FSS) Program
 Demonstration.

*Description of the need for
 information and proposed use:* The
 Department is conducting this study
 under contract with MDRC and its
 subcontractors (Branch Associates and
 M. Davis and Company, Inc.). The
 project is an evaluation of the Family
 Self-Sufficiency Program operated at
 Public Housing Agencies (PHAs) across
 the United States. The study will use
 random-assignment methods to evaluate
 the effectiveness of the program. FSS
 has operated since 1992 and serves
 voucher holders and residents of public
 housing. The FSS model is essentially a
 five-year program, and includes case
 management plus an escrow account.
 FSS case managers create a plan with
 families to achieve goals and connect
 with services that will enhance their
 employment opportunities. Families
 accrue money in their escrow accounts
 as they increase their earnings. To date,
 HUD has funded two other studies of
 the FSS program, but neither can
 indicate how well families would have
 done in the absence of the program. A
 random assignment model is needed
 because participant self-selection into
 Family Self Sufficiency program limits
 the ability to know whether program
 features rather than the characteristics
 of the participating families caused
 tenant income gains. Random
 assignment will limit the extent to
 which selection bias is driving observed
 results. The demonstration will
 document the progress of a group of FSS
 participants from initial enrollment to
 program completion (or exit). The intent
 is to gain a deeper understanding of the
 program and illustrate strategies that
 assist participants to obtain greater
 economic independence. While the
 main objective of FSS is stable, suitable
 employment, there are many interim
 outcomes of interest, including: Getting
 a first job; getting a higher paying job;
 self-employment/small business
 ownership; no longer needing benefits
 provided under one or more welfare
 programs; obtaining additional
 education, whether in the form of a high
 school diploma, higher education
 degree, or vocational training; buying a
 home; buying a car; setting up savings
 accounts; or accomplishing similar goals
 that lead to economic independence.

Data collection will include the
 families that are part of the treatment
 and control groups. Data will be
 gathered through surveys.

Members of the affected public:

Families receiving subsidized housing and enrolled in the FSS program (treatment group)	1,281
Families receiving subsidized housing and not enrolled in the FSS program (control group)	1,270

Estimation of the total number of respondents, frequency of response, and hours needed to prepare the information collection including number of hours of response:

Instrument	Number of respondents	Number responses per respondent	Average burden/response (in hours)	Total burden hours
36-Month Survey	2,551	1	45 minutes (.75)	1,913
Total				1,913

Status of the proposed information collection: Pending OMB approval.

Authority: Title 13 U.S.C. 9(a), and title 12, U.S.C., section 1701z-1 *et seq.*

Dated: April 21, 2016.

Katherine M. O'Regan,
Assistant Secretary for Policy Development and Research.
