severe weather conditions such as rain, snow, and extreme heat. The AC therefore recommends that airport operators consider protecting the outdoor SARA and the pathways to the SARA from the elements. For the indoor SARA, the AC recommends natural lighting whenever possible.

The FAA is also aware that it may be difficult for people with visual impairments to navigate within the SARA. To allow these people to familiarize themselves with the SARA’s layout before entering, the AC recommends placing special signs, maps, and other orienting cues at the entrance to the SARA. In addition, this AC defines the airport terminal for the purpose of helping airports decide on the number and locations of required SARA. To enhance SARAs, the FAA is seeking input on new concept cleaning technology: like nano technology as a potential for self-cleaning SARA.

Way-Finding Technologies

The FAA understands that wayfinding is necessary for safe and efficient mobility in a complex airport terminal. The FAA recognizes that wayfinding in a complex airport terminal might be a challenge for people who are blind or have vision impairments. Additionally, the FAA recognizes escorting is time consuming and diminishes independence for individuals with disabilities.

Accordingly, the FAA specifically seeks comments about:
- RFID (Radio Frequency Identification) systems for possible use in wayfinding and mobility in the airport terminal for people with visual impairments;
- Audio-haptic systems designed for enhancing orientation and mobility skills in people with visual impairments; and
- Other technology innovations to enhance wayfinding is interested in public input regarding the use of wayfinding technologies and other technology innovations at airports.

Issued in Washington, DC, on April 28, 2016.

Michael J. O’Donnell,
Director of Airport Safety and Standards.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration
[Docket No. FHWA–2016–0013]

Agency Information Collection Activities: Request for Comments for a New Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice and request for comments.

SUMMARY: FHWA invites public comments about our intention to request the Office of Management and Budget’s (OMB) approval for a new information collection, which is summarized below under SUPPLEMENTARY INFORMATION. We published a Federal Register Notice with a 60-day public comment period on this information collection on February 10, 2016. We are required to publish this notice in the Federal Register by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by June 6, 2016.

ADDRESSES: You may send comments within 30 days to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, Attention DOT Desk Officer. You are asked to comment on any aspect of this information collection, including:
1. Whether the proposed collection is necessary for the FHWA’s performance;
2. the accuracy of the estimated burden; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and
4. ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. All comments should include the Docket number FHWA–2016–0013.

FOR FURTHER INFORMATION CONTACT:
Pamela Woodruff, 202–366–1607, Office of Civil Rights, Federal Highway Administration, Department of Transportation, 1200 New Jersey Ave. SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Background: Title 23, Part 140(a), requires the FHWA to ensure equal opportunity regarding contractors’ employment practices on Federal-aid highway projects. To carry out this requirement, the contractors must submit to the State Transportation Agencies (STAs) on all work being performed on Federal-aid contracts during the month of July, a report on its employment workforce data. This report provides the employment workforce data on these contracts and includes the number of minorities, women, and non-minorities in specific highway construction job categories. This information is reported on Form PR–1391, Federal-Aid Highway Construction Contractors Summary of Employment Data. The statute also requires the STAs to submit a report to the FHWA summarizing the data entered on the PR–1391 forms. This summary data is provided on Form PR–1392, Federal-Aid Highway Construction Contractors Summary of Employment Data. The STAs and FHWA use this data to identify patterns and trends of employment in the highway construction industry, and to determine the adequacy and impact of the STA’s and FHWA’s contract compliance and on-the-job (OJT) training programs. The STAs use this information to monitor the contractors’ employment and training of minorities and women in the traditional highway construction crafts. Additionally, the data is used by FHWA to provide summarization, trend analyses to Congress, DOT, and FHWA officials as well as others who request information relating to the Federal-aid highway construction EEO program. The information is also used in making decisions regarding resource allocation; program emphasis; marketing and promotion activities; training; and compliance efforts.

Respondents: 11,077 annual respondents for form PR–1391, and 52 STAs annual respondents for Form PR–1392, total of 11,129.

Frequency: Annually.

Estimated Average Burden per Response: FHWA estimates it takes 30 minutes for Federal-aid contractors to complete and submit Form PR–1391 and 8 hours for STAs to complete and submit Form PR–1392.

Estimated Total Amount Burden Hours: Form PR–1391–5,539 hours per year; Form PR–1392–416 hours per year, total of 5,955 hours annually.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including:
1. Whether the proposed collection is necessary for the FHWA’s performance;
2. the accuracy of the estimated burden; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and
4. ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information.
The agency will summarize and/or include your comments in the request for OMB’s clearance of this information collection.
