Agenda

The NTAP is a joint advisory panel of the Mid-Atlantic and New England Fishery Management Council. It is composed of Council members, fishing industry, academic, and government and non-government fisheries experts who will provide advice and direction on the conduct of travel research. The NTAP was established to bring commercial fishing, fisheries science, and fishery management professionals in the northeastern U.S. together to identify concerns about regional research survey performance and data, to identify methods to address or mitigate these concerns, and to promote mutual understanding and acceptance of the results of this work among their peers and in the broader community.

Topics to be discussed at the meeting include review of recent NEFSC bottom trawl survey analyses, NEFSC bottom trawl survey re-stratification efforts, and NEFSC gear efficiency work; develop recommended actions by the NTAP; and discussion of the use of currently contracted NEFSC vessel time and methods to supplement NEFSC surveys,
