## II. What action is EPA taking?

EPA is announcing its receipt of several pesticide petitions filed under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, requesting the establishment or modification of regulations in 40 CFR

part 180 for residues of pesticide chemicals in or on various food commodities. EPA is taking public comment on the requests before responding to the petitioners. EPA is not proposing any particular action at this time. EPA has determined that the pesticide petitions described in this document contain the data or information prescribed in FFDCA section 408(d)(2), 21 U.S.C. 346a(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the pesticide petitions. After considering the public comments, EPA intends to evaluate whether and what action may be warranted. Additional data may be needed before EPA can make a final determination on these pesticide petitions.

Pursuant to 40 CFR 180.7(f), a summary of each of the petitions that are the subject of this document, prepared by the petitioner, is included in a docket EPA has created for each rulemaking. The docket for each of the petitions is available at <http://www.regulations.gov>.

As specified in FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), EPA is publishing notice of the petitions so that the public has an opportunity to comment on these requests for the establishment or modification of regulations for residues of pesticides in or on food commodities. Further information on the petitions may be obtained through the petition summaries referenced in this unit.

8. *PP 6E8446*. (EPA-HQ-OPP-2016-0128). IR-4, Rutgers University, 500 College Rd. East, Suite 201 W, Princeton, NJ 08540, requests to amend the tolerances in 40 CFR 180.620 for residues of the insecticide etofenprox (2-(4-ethoxyphenyl)-2-methylpropyl 3-

phenoxybenzyl ether) in or on all food commodities (including feed commodities) not otherwise listed from 5.0 ppm to 0.40 ppm. This amendment may potentially impact/reduce the tolerances established in or on livestock commodities. The analytical method consisting of LC/MS/MS is used to measure and evaluate the chemical etofenprox.

9. *PP 6E8452*. (EPA-HQ-OPP-2016-0166). IR-4, Rutgers University, 500 College Rd. ppm; and pistachio at 0.01 ppm. The analytical method consisting of LC/MS/MS is used to measure and evaluate the chemical indaziflam.

#### *New Tolerance Exemptions*

1. *PP IN-10891*. (EPA-HQ-OPP-2016-0123). BASF Corp., 26 Davis Dr., Research Triangle Park, NC 27709, requests to establish an exemption from the requirement of a tolerance for residues of *Bacillus simplex* strain BU288 when used as a pesticide inert ingredient (emulsifier) applied to growing crops and raw agricultural commodities after harvest under 40 CFR 180.910. The petitioner believes no analytical method is needed because it is not required for an exemption from the requirement of a tolerance.

2. *PP IN-10907*. (EPA-HQ-OPP-2016-0201). Keller and Heckman, LLP, 1001 G St. NW., Suite 500 West, Washington, DC 20001 (on behalf of

Trinseo LLC, 1000 Chesterbrook Blvd., Berwyn, PA 19312-1084), requests to establish an exemption from the requirement of a tolerance for residues of butanedioic acid, 2-methylene-, polymer with 1,3-butadiene, ethenylbenzene and 2-hydroxyethyl 2-propenoate (CAS Reg. No. 36089-06-2) when used as an inert ingredient (emulsifier or binder) in pesticide formulations under 40 CFR 180.960. The petitioner believes no analytical method is needed because it is not required for an exemption from the requirement of a tolerance.
