SUPPLEMENTARY INFORMATION:

Title of Collection: Grantee Reporting Requirements for Materials Research Science and Engineering Centers (MRSECs).

OMB Number: 3145–0230.

Expiration Date of Approval: December 31, 2016.

Type of Request: Intent to seek approval to renew an information collection.

Overview of This Information Collection

The Materials Research Science and Engineering Centers (MRSECs) Program supports innovation in interdisciplinary research, education, and knowledge transfer. MRSECs build intellectual and physical infrastructure within and between disciplines, weaving together knowledge creation, knowledge integration, and knowledge transfer. MRSECs conduct world-class research through partnerships of academic institutions, national laboratories, industrial organizations, and/or other public/private entities. New knowledge

thus created is meaningfully linked to society.

MRSECs enable and foster excellent education, integrate research and education, and create bonds between learning and inquiry so that discovery and creativity more fully support the learning process. MRSECs capitalize on diversity through participation in center activities and demonstrate leadership in the involvement of groups underrepresented in science and engineering.

MRSECs are required to submit annual reports on progress and plans, which are used as a basis for performance review and determining the level of continued funding. To support this review and the management of a Center, MRSECs will be required to develop a set of management and performance indicators for submission annually to NSF via the Research Performance Project Reporting module in Research.gov and an external technical assistance contractor that collects programmatic data electronically. These indicators are both quantitative and descriptive and may include, for example, the characteristics of center personnel and students; sources of financial support and in-kind support; expenditures by operational component; characteristics of industrial and/or other sector participation; research activities; education activities; knowledge transfer activities; patents, licenses; publications; degrees granted to students involved in Center activities; descriptions of significant advances and other outcomes of the MRSEC effort. Such reporting requirements are included in the cooperative agreement that is binding between the academic institution and NSF.

Each Center's annual report will address the following categories of activities: (1) Research, (2) education, (3) knowledge transfer, (4) partnerships, (5) shared experimental facilities, (6) diversity, (7) management, and (8) budget issues.

For each of the categories the report will describe overall objectives for the year, problems the Center has encountered in making progress towards goals, anticipated problems in the following year, and specific outputs and outcomes.

MRSECs are required to file a final report through the RPPR and external technical assistance contractor. Final reports contain similar information and metrics as annual reports, effectively they constitute the last annual report; the Program Officer maintains a cumulative database with all relevant achievements and metrics.

Use of the Information: NSF will use the information to continue funding of the Centers, and to evaluate the progress of the program.

Estimate of Burden: 80 hours per center for 21 centers for a total of 1,680 hours.

Respondents: Non-profit institutions.
Estimated Number of Responses per Report: One from each of the 21 MRSECs.

Comments: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

I. Discussion

The RIS summarizes the NRC’s regulatory oversight of radium-226 under military control, and explains that the NRC and the DoD will coordinate on CERCLA response actions at the DoD sites with radioactive material, including radium, that is not licensed under the Atomic Energy Act of 1954, as amended (AEA) through an MOU. On April 28, 2016, the NRC and the DoD entered into an MOU that governs both agencies’ roles and responsibilities with respect to the DoD’s CERCLA response actions for radium contamination and other unlicensed material contamination.

The final RIS and an enclosure containing a summary of public comments on the draft RIS and NRC’s responses are available in ADAMS under Accession No. ML15167A324. The MOU is available in ADAMS under Accession No. ML16092A294.

II. Congressional Review Act

This RIS is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

Dated at Rockville, Maryland, this 13th day of May 2016.
