

the following four alternatives (among others): (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.

47. The Commission believes that any economic burden these proposed rules may have on carriers is outweighed by the benefits to consumers. The compliance costs identified in Section D are small. The Commission seeks comment on how to minimize the economic impact of these proposals. For instance, the Commission seeks comment on the specific costs of the measures discussed in the *NPRM* and ways to mitigate any implementation costs. The Commission also seeks comment on the overall economic impact these proposed rules may have because it seeks to minimize all costs associated with these proposed rules. Finally, the Commission seeks comment on whether to consider the size of the calling entity or the type of debt being collected in determining the appropriate timeframes for implementation.

SUPPLEMENTARY INFORMATION:

I. Background

Currently, the language in the FAR is not consistent in terms of whether offerors need to be registered in SAM prior to submitting an offer or prior to award. Per FAR clause 52.204–7 an offeror is not “registered in the SAM database” unless an offeror has completed its online annual representations and certifications. FAR 52.204–8(b) and (d) state that if clause 52.204–7 is included in the solicitation, then the offeror verifies by submission of the offer that the representations and certifications in SAM are current and accurate. While the clauses instruct offerors to complete representations and certifications by registering in SAM prior to the submission of offers, the policy at FAR 4.1102 states that SAM registration (which includes online reps and certs) must be completed by the time of award. In order to correct this inconsistency DoD, GSA, and NASA are proposing to amend FAR 4.1102 and 4.1103 to require offeror registration in SAM prior to submission of an offer.

In addition, the proposed rule will require contracting officers to use the name and physical address from the contractor’s SAM registration for the provided Data Universal Numbering System (DUNS). We recognize that there is an ongoing FAR case (2015–022, Unique Identification of Entities Receiving Federal Awards) to remove the reference to the DUNS number, and once the final rule from that case is published, references to the DUNS number will be changed. This proposed rule also removes the term “division name” from the FAR text at FAR 4.1102, clause 52.204–13, and provision 52.212–4.

The proposed rule also changes the referenced Web site “acquisition.gov” to “SAM.gov” to be consistent with the rest of the FAR. “Database” is also added to “SAM” so that in the FAR it is clearly understood that the reference is to the “SAM database”.

II. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety

effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under Section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This proposed rule is not a major rule under 5 U.S.C. 804.

V. Regulatory Flexibility Act

DoD, GSA, and NASA do not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the proposed rule would only change when an offeror must be registered in SAM. However, an initial regulatory flexibility analysis (IRFA) has been performed and is summarized as follows:

FAR subpart 4.11 was updated by FAR case 2012–033 which was published in the **Federal Register** at 78 FR 37676 on June 21, 2013, to reflect the retirement of the Central Contractor Registration and Online Representation and Certification Application systems and the implementation of SAM. Since the final rule was published, the Department of Defense (DoD) identified three clarifications that need to be made to the subpart and its associated provisions and clauses.

Currently, the language in the FAR is not consistent in terms of whether offerors need to be registered in SAM prior to submitting an offer or prior to award. Per FAR clause 52.204–7 an offeror is not “registered in the SAM database” unless an offeror has completed its online annual representations and certifications. FAR 52.204–8(b) and (d) state that if clause 52.204–7 is included in the solicitation, then the offeror verifies by submission of the offer that the representations and certifications in SAM are current and accurate. While the clauses instruct offerors to complete representations and certifications by registering in SAM prior to submission of offers, the policy at FAR 4.1102 states that SAM registration (which includes online reps and certs) must be completed by the time of award.

In order to correct this inconsistency the rule proposes that offerors be registered in SAM prior to submission of an offer. Once offerors are registered in SAM they are in the system and are only required to update SAM registration in accordance with the clause. This eliminates the need for potential offerors to complete reps and certs multiple times when responding to solicitations.

The proposed rule would apply to small businesses that submit offers to the Federal Government. The rule contains information collection requirements. OMB has cleared this information collection requirement under OMB Control Number 9000–0159, titled: Central Contractor Registration. GSA has submitted a request to OMB to change

the name of the collection to “System for Award Management Registration.” That request is pending.

The total number of small businesses in the Federal Procurement Data System (FPDS) for FY 2013 is 111,036. This proposed rule would apply to that number of small businesses, as well as an estimated equal number that did not receive an award for FY 2013.

There will be no burden on small businesses because this proposed rule change does not place any new requirements on small entities. The only change is when the requirement for submission of the representations and certifications must occur.

This proposed rule requires offerors to be registered in SAM prior to submission of an offer. Once offerors are registered in SAM they are in the system and are only required to update SAM registration in accordance with the clause. This eliminates the need for potential offerors to complete representations and certifications multiple times when responding to solicitations.

The proposed rule does not duplicate, overlap, or conflict with any other Federal rules.

There are no significant alternatives to the rule which accomplish the stated objectives of applicable statutes and which minimize any significant economic impact of the proposed rule on small entities.

The Regulatory Secretariat Division has submitted a copy of the IRFA to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the IRFA may be obtained from the Regulatory Secretariat Division. DoD, GSA, and NASA invite comments from small business concerns and other interested parties on the expected impact of this proposed rule on small entities.

DoD, GSA, and NASA will also consider comments from small entities concerning the existing regulations in subparts affected by the proposed rule consistent with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (FAR Case 2015–005), in correspondence.

VI. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. Chapter 35) applies. The proposed rule contains information collection requirements. OMB has cleared this information collection requirement under OMB Control Number 9000–0159; Central Contractor Registration. GSA has submitted a request to OMB to change the name of the collection to “System for Award Management Registration.” That request is pending.
