Title: Damage Tolerance and Fatigue Evaluation of Composite Rotorcraft Structures.

Form Numbers: None.

Type of Review: Renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on November 10, 2015 (80 FR 69772). The "Damage Tolerance and Fatigue Evaluation of Composite Rotorcraft Structures" final rule (76 FR 74655) revised parts 27 and 29 of Title 14 of the Code of Federal Regulations to add new certification standards for normal and transport category rotorcraft to address advances in structural damage tolerance and fatigue substantiation technology for composite rotorcraft structures. To obtain type certification of a rotorcraft, an applicant must show that the rotorcraft complies with specific certification requirements. To show compliance, the applicant must submit substantiating data. FAA engineers or designated engineer representatives from industry review the required data submittals to determine if the rotorcraft complies with the applicable minimum safety requirements for damage tolerance and fatigue evaluation of composite structures and that the rotorcraft has no unsafe features in the composite structures.

Respondents: Approximately 6 applicants for certification for 10.5 part 27 rotorcraft and 6 part 29 rotorcraft.

Frequency: Information is collected on occasion.

Estimated Average Burden per Response: 54.5 hours.

Estimated Total Annual Burden: 109 hours.

Issued in Washington, DC, on January 13, 2016.
