

questions with user-friendly response features such as radio buttons, drop-down menu responses, pop-up explanation bubbles, Web page links, fillable narrative text fields, and document upload options. In addition, the OMMS Form incorporates functionality that, depending upon certain responses, pre-populates specific fields, and prompts the user to provide additional information. By eliciting specific information from the user, the OMMS Form will facilitate communication between the user and the Ombudsman, reduce response and resolution times, and maximize Ombudsman staff resources available for recording, processing, and responding to matters. The requested information collection is voluntary and will not change the contact methods currently available.

The Commission expects that OMMS will be operative and the OMMS Form publicly available through the Commission's Web site, <https://www.sec.gov>.

The Commission estimates that the total reporting burden for using the OMMS Form will be 250 hours. The calculation of this estimate depends on how many members of the public use the form each year and the estimated time it takes to complete the forms: 500 respondents $\times$ 30 minutes per submission = 250 burden hours. The estimates of average burden hours are made solely for the purposes of the Paperwork Reduction Act. The total estimated one-time cost to the federal government of creating OMMS and the OMMS Form is \$400,000.

An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget control number.

Written comments are invited on all aspects of this proposed information collection request, in particular: (a) Whether this collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden imposed by the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on users, including through the use of automated collection techniques or other forms of information technology.

Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.
