

Correction

In the **Federal Register** of April 27, 2016, in FR Doc. 2016–09812, the following corrections are made:

1. On page 24828, in the first column, under the heading “Key Dates”, the correct Earliest Anticipated Start Date should read as “Earliest Anticipated Start Date: August 15, 2016”.

2. On page 24829, in the first column, under the heading “Project Period”, the correct paragraph should read as “The project period will be for three (3) years and will run consecutively from August 15, 2016 to August 14, 2019”.

Dated: May 11, 2016.

Elizabeth A. Fowler,

Deputy Director for Management Operations, Indian Health Service.

Submission for OMB Review; 30-Day Comment Request; Surveys and Interviews To Support an Evaluation of the Innovative Molecular Analysis Technologies (IMAT) Program (NCI)

SUMMARY: Under the provisions of Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Cancer Institute, the National Institutes of Health, has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below. This proposed information collection was previously published in the **Federal Register** on March 23, 2016, Vol. 81, Page 15541 and allowed 60-days for public comment. The purpose of this notice is to allow an additional 30 days for public comment. The National Cancer Institute (NCI), National Institutes of Health, may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended,

revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

Direct Comments to OMB: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the: Office of Management and Budget, Office of Regulatory Affairs, *OIRA_submission@omb.eop.gov* or by fax to 202–395–6974, Attention: NIH Desk Officer.

Comment Due Date: Comments regarding this information collection are best assured of having their full effect if received within 30 days of the date of this publication.

FOR FURTHER INFORMATION CONTACT: To obtain a copy of the data collection plans and instruments, or request more information on the proposed project, contact: Anthony Dickherber, NCI Center for Strategic Scientific Initiatives, 31 Center Drive, Rm10A33, Bethesda, MD 20892 or call non-toll-free number 301–547–9980 or Email your request, including your address to: *dickherberaj@mail.nih.gov*. Formal requests for additional plans and instruments must be requested in writing.

Proposed Collection: Surveys and Interviews to Support an Evaluation of the Innovative Molecular Analysis Technologies (IMAT) Program (NCI), 0925–0720, Expiration Date 5/31/2016—EXTENSION, National Cancer Institute (NCI), National Institutes of Health (NIH).

Need and Use of Information Collection: The purpose of the proposed evaluation is to pursue a comprehensive process and outcome assessment of the 15-year old Innovative Molecular Analysis Technologies (IMAT) program. While the program consistently offers promising indicators of success, the full program has not been evaluated since 2008, and never in as comprehensive a manner as has been formulated in the current evaluation plan. An outcome evaluation of the long-standing National Cancer Institute’s (NCI) IMAT program

presents a rich and unique opportunity likely to serve institutes across the National Institutes of Health (NIH), and perhaps other federal agencies, considering the costs and benefits of directing resources towards supporting technology development. An award through the NIH Evaluation Set-Aside program to support this evaluation, for which NIH-wide relevance is a principle element of determining merit for support, is testament to this. The evaluation serves as an opportunity to gauge the impact of investments in technology development and also to assess the strengths and weaknesses of phased innovation award mechanisms. Prior approval from OMB allowed for extensive surveys and interviews already, and this extension is requested to accommodate unforeseen delays in collecting the remaining information.

Like all institutes and centers (ICs) of the NIH, NCI seeks opportunities for improving their programs’ utility for the broad continuum of researchers, clinicians and ultimately patients. NCI Acting Director Douglas Lowy and other leadership across NCI, as well as the NCI Board of Scientific Advisors, will be the primary users of the evaluation results. Findings are primarily intended for considering the long-term strategy to support innovative technology development and how to more efficiently translate emerging capabilities through such technologies into the promised benefits for cancer research and clinical care. Interviews with grantees, program officers, review officers, and other NIH awardees make up a crucial component of the evaluation plan and will largely follow set survey protocols. Specific near-term aims include the use of this information to consider the utility of continued investment through existing solicitations and in strategic planning generally for institute support for innovative technology development.

OMB approval is requested for 1 year. There are no costs to respondents other than their time. The total estimated annualized burden hours are 233.

ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Type of respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total annual burden (in hours)
Interview—IMAT Grantee	IMAT Awardees	18	1	1	18
Web-based Survey—Technology Grantees.	IMAT Awardees; Other NIH Awardees representing comparison group.	379	1	30/60	190
Interview—Tech End-Users	Technology End-Users	50	1	30/60	25
Totals	447	447	233

Dated: May 19, 2016.

Project Clearance Liaison, National Cancer Institute, NIH.
