

with the Food and Drug Administration (FDA).

Need and Use of Information Collection: This is a request to continue the Population Assessment of Tobacco and Health (PATH) Study's conduct of methodological studies in support of improvements in the Study's approaches for data and biospecimen collection. The PATH Study is a national longitudinal cohort study of

tobacco use behavior and health among the U.S. household population of adults age 18 and older and youth ages 12 to 17; the Study conducts annual or biannual interviews and collects biospecimens from adults and youth to inform FDA's regulatory actions under the Family Smoking Prevention and Control Act. The methodological studies under this reinstatement will continue to enhance the approaches used by the

PATH Study for data and biospecimen collections to obtain high quality and useful data; minimize respondent burden; and achieve and maintain high response, retention, and follow-up rates.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total annualized burden hours are 29,750.
