FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the Deputy Assistant Secretary of Defense, Military Community and Family Policy, ATTN: Casualty Affairs, 4000 Defense Pentagon, Washington, DC 20301-4000.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Mortuary Affairs Forms; Statement of Disposition of Military Remains, DD Form X634; Disposition of Remains Election Statement Notification of Identified Partial Remains, DD Form X635; Disposition of Remains Election Statement Notification of Subsequently Identified Partial Remains, DD Form X636; Disposition of Organs Retained for Extended Examination, DD Form X637; Advanced Restorative Art of Remains, DD Form X638; Election for Air Transportation of Remains of Casualties Dying in a Theater of Combat Operations, DD Form X639; OMB Control Number 0704-XXXX.

Needs and Uses: The information collection requirement is necessary to obtain the election (as applicable) of the Person Authorized to Direct Disposition (PADD) or the Person Authorized to Effect Disposition (PAED) of the remains of the decedent. These forms were directed by the Secretary of Defense for transparency and standardization of the mortuary procedures as part of the Final Report of the Dover Port Mortuary Independent Review Subcommittee Implementation Plan and 180-day study. The applicable form(s) is included in the individual case file of the decedent.

Affected Public: Business or other for profit; Individuals or Household.

Annual Burden Hours: 225.

Number of Respondents: 900.

Responses per Respondent: 1.

Annual Responses: 900.

Average Burden Per Response: 15 minutes.

Frequency: On occasion.

The respondents are the PADD or PAED of the decedent for whom mortuary services as described on the applicable form (DD Form X634; DD Form X635; DD Form X636; DD Form X637; DD Form X638; or DD Form X639) is recommended or required, and the witness to that election. The PADD or PAED documents their election, and the PADD or PAED and witness sign the applicable form to formalize this process and document the election of the PADD or PAED as applicable. These forms become a part of the Official Individual Deceased Personnel File. If the PADD or PAED does not sign these forms, then the Department cannot provide mortuary and transportation services as requested by the PADD or PAED. Currently there is a lack of standardization across the Military Services, as each Service currently utilizes different forms for these elections and they do not all capture the same information even on similar forms. Standardizing the information collected is essential in maintaining the transparency and integrity of the mortuary affairs process.

SUPPLEMENTARY INFORMATION: The Corps and Reclamation are issuing this notice pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969 (NEPA), as amended, 42 U.S.C. 4321 *et seq.*; the Council on Environmental Quality's (CEQ) regulations for implementing the procedural provisions of NEPA, 43 CFR parts 1500 through 1508; the Department of the Interior's NEPA regulations, 43 CFR part 46.

Background Information.

Reclamation's Lower Yellowstone Project is located in eastern Montana and western North Dakota. Intake Diversion Dam is located approximately 70 miles upstream of the confluence of the Yellowstone and Missouri rivers near Glendive, Montana. The Lower Yellowstone Project was authorized by the Secretary of the Interior on May 10, 1904. Construction of the Lower Yellowstone Project began in 1905 and included Intake Diversion Dam (also known as Yellowstone River Diversion Dam)—a wood and stone diversion dam that spans the Yellowstone River and diverts water into the Main Canal for irrigation. The Lower Yellowstone Project was authorized to provide a dependable water supply sufficient to irrigate approximately 54,000 acres of land on the benches above the west bank of the Yellowstone River. Water is also supplied to irrigate approximately 830 acres in the Intake Irrigation Project and 2,200 acres in the Savage Unit. The average annual volume of water diverted for these projects is 327,046 acre-feet.

The U.S. Fish and Wildlife Service (Service) listed the pallid sturgeon as endangered under the Endangered Species Act (ESA) in 1990. The best available science suggests Intake Diversion Dam impedes upstream migration of pallid sturgeon and their access to spawning and larval drift habitats. The lower Yellowstone River is considered by the Service to provide one of the best opportunities for recovery of pallid sturgeon.
