

- Pass through each of the different security screening locations in the airport;
- Are subject to more intensive screening of their baggage or person; and
- Experience different volume conditions and wait times as they proceed through the security checkpoints.

Each survey includes 10 to 15 questions, and each question promotes a quality response so that TSA can identify areas in need of improvement. All questions concern aspects of the passenger's security screening experience.

TSA collects this information in order to continue to assess customer satisfaction in an effort to manage TSA employee performance more efficiently. OMB has previously approved 82 questions. TSA is requesting an extension of the approval for the information collection.

TSA personnel have the capability to conduct this survey at 25 airports each year. Based on prior survey data and research, TSA estimates 384 responses from the passengers at each airport. The average number of respondents is estimated to be 9,600 per year (384 passengers × 25 airports). TSA estimates that the time it takes to complete the survey either online or by writing on the form ranges from 3 to 7 minutes, an average of 5 minutes (0.083 hrs.) per respondent. Therefore, the annual burden is 800 hours (9,600 responses × 0.083 hours).

Section 1: Program Background and Purpose:

NDRC awardees identified in this notice were allocated Community Development Block Grant National Resilient Disaster Recovery (CDBG–NDR) grant funds on a competitive basis. These funds were made available by the Appropriations Act for disaster recovery from major disasters declared under the Robert T. Stafford Disaster Relief and Emergency Assistance Act of 1974 (42 U.S.C. 5121 *et seq.*) (Stafford Act) in 2011, 2012, and 2013. The Appropriations Act made available \$16 billion in Community Development Block Grant Disaster Recovery (CDBG–DR) funds. On March 1, 2013, the President issued a sequestration order pursuant to section 251A of the Balanced Budget and Emergency Deficit Control Act, as amended (2 U.S.C. 901a), and reduced funding for CDBG disaster recovery grants under the Appropriations Act to \$15.18 billion.

HUD has not allocated other Appropriations Act funds competitively. As of September 2014, HUD had allocated or set aside approximately \$13 billion–\$14 billion in response to Hurricane Sandy, and Tropical Storms Irene and Lee; \$514 million in response to disasters occurring in 2011 or 2012; and \$654 million in response to other 2013 disasters. The Department determined that the data available for the earliest disasters eligible under the Appropriations Act no longer credibly represented additional current unmet needs (beyond those for which HUD had already allocated funding by formula) to support a formula allocation method for the remaining funding. No other reasonably current data sources common to all possible eligible jurisdictions existed at the time of the allocation. Because the law directs that CDBG–DR assistance must flow to the Most Impacted and Distressed areas with unmet recovery and revitalization needs related to the effects of a covered major disaster, HUD decided that a competition framework would work best to elicit the data needed to inform allocation choices, and ensure that the unmet disaster recovery and revitalization needs of communities around the country were appropriately considered.

To comply with statutory direction that CDBG–NDR funds be used for disaster-related expenses in the Most Impacted and Distressed areas related to the Qualified Disaster, HUD has required that Grantees address unmet needs in areas identified in the Grantee's approved application and accepted by HUD as "Most Impacted
