#### SUPPLEMENTARY INFORMATION:

##### I. Background

FDA is announcing the availability of a draft guidance for industry #237 entitled "Oncology Drugs for Companion Animals." This guidance document makes recommendations to sponsors of investigational oncology drugs for use in companion animals (e.g., dogs, cats, and horses). The guidance discusses the contents of the target animal safety, effectiveness, and labeling technical sections of an NADA for oncology drugs administered as single agents. The guidance also includes recommendations on how to address human user safety concerns.

In the guidance, FDA recommends that sponsors of multi-drug regimens contact the Center for Veterinary Medicine (CVM) to discuss a product development plan. While sponsors may choose alternate pathways for approval, the Agency is recommending that sponsors first discuss their proposed study plans with CVM, especially if they choose to use an alternative pathway for approval. The Agency

encourages sponsors to schedule a presubmission conference with CVM as they begin to make their investigational plans to ensure that they are completely informed on the requirements contained in the statute and regulations.

##### II. Significance of Guidance

This level 1 draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on oncology drugs for companion animals. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

##### III. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either <http://www.fda.gov/AnimalVeterinary/GuidanceComplianceEnforcement/GuidanceforIndustry/default.htm> or <http://www.regulations.gov>.

Dated: June 7, 2016.
