SUPPLEMENTARY INFORMATION:

I. Overview: Pursuant to 49 U.S.C. 30118(d) and 30120(h) (see implementing rule at 49 CFR part 556), Volkswagen submitted a petition for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential to motor vehicle safety.

This notice of receipt of Volkswagen's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

II. Vehicles Involved: Affected are approximately 325 MY 2016 Volkswagen Beetle Convertible passenger cars that were manufactured between June 18, 2015, and November 9, 2015.

III. Noncompliance: Volkswagen stated that the subject vehicles have a Tire Placard Label that is misprinted with an incorrect tire size as compared to the tires the vehicle was equipped with and therefore does not fully conform to paragraph S4.3(d) of FMVSS No. 110.

IV. Rule Text: Paragraph S4.3(d) of FMVSS No. 110 requires, in pertinent part:

S4.3 Placard. Each vehicle, except for a trailer or incomplete vehicle, shall show the information specified in S4.3 (a) through (g), and may show, at the manufacturer's option, the information specified in S4.3 (h) through (i), on a placard permanently affixed to the driver's side B-pillar . . .

(d) Tire size designation, indicated by the headings "size" or "original tire size" or "original size," and "spare tire" or "spare," for the tires installed at the time of the first purchase for purposes other than resale. For full size spare tires, the statement "see above" may, at the manufacturer's option replace the tire size designation. If no spare tire is provided, the word "none" must replace the tire size designation;

V. Summary of Volkswagen's Petition: Volkswagen described the subject noncompliance and stated its belief that the noncompliance is inconsequential to motor vehicle safety for the following reasons:

(1) Volkswagen stated that the condition described (tire placard with an incorrect label size on it) would not adversely affect the tire and loading capability of the vehicle.

(2) Volkswagen stated that the loading and combined weight information was printed correctly on both versions of the Tire Placard Label.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject vehicles that Volkswagen no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve vehicle distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant vehicles under their control after Volkswagen notified them that the subject noncompliance existed.

Authority: 49 U.S.C. 30118, 30120; delegations of authority at 49 CFR 1.95 and 501.8.

Jeffrey M. Giuseppe,

Director, Office of Vehicle Safety Compliance.

Background: The Port Performance Freight Statistics Working Group has been created in accordance with Section 6018 of the *Fixing America's Surface Transportation (FAST) Act* (Pub. L. 114-94; Dec. 4, 2015; 129 Stat. 1312). The Working Group supports development of the newly-established BTS Port Performance Freight Statistics Program. The goal of the program is "to provide nationally consistent measures of performance" of the nation's largest ports, and to report annually to Congress on port capacity and throughput.

The Working Group is established in the FAST Act to provide recommendations to the BTS Director on matters related to port performance measures; to identify a standard for port data; to specify standards for consistent port performance measures; to recommend statistics for measuring port capacity and throughput; and to develop a process to collect timely and consistent data. The FAST Act also identifies the membership of the Working Group, and sets a due date for recommendations to the BTS Director of December 4, 2016.

Agenda: This will be the Working Group's first meeting and will include a nonpublic administrative work session, including briefings on their responsibilities as Special Government Employees before the public session. The public session, starting at 10:30 a.m., will include U.S. Department of Transportation staff providing an overview of FAST ACT and an update of the Department's progress implementing its Port Performance

Freight Statistics Program and related provisions. The Working Group will commence development of a list of tasks and subtask necessary for it to:

(a) Identify a generally accepted industry standard for port data collection and reporting.

(b) Specify standards for collecting data and reporting nationally consistent port performance measures.

(c) Make recommendations for statistics measuring on U.S. port capacity and throughput.

(d) Develop a process for the U.S. Department of Transportation (hereafter, "Department") to collect timely and consistent data, including identifying safeguards to protect proprietary information.

The final meeting agenda will be posted on the BTS Web site at www.bts.gov/port_performance in advance of the meeting.
