

and/or quantity of EFH . . . [and] may include direct (e.g. contamination or physical disruption), indirect (e.g. loss of prey, reduction in species' fecundity), site-specific or habitat-wide impacts, including individual, cumulative, or synergistic consequences of actions." NMFS may recommend measures for attachment to the federal action to protect EFH; however, such recommendations are advisory, and not prescriptive in nature. EPA has evaluated the General Permit and has made the determination that issuance of the General Permit is not likely to adversely affect EFH. NMFS has concurred with this determination.

Executive Order 12866: The Office of Management and Budget (OMB) exempts this action from the review requirements of Executive Order 12866 pursuant to Section 6 of that order.

Economic Impact [Executive Order 12291]: The EPA has reviewed the effect of Executive Order 12291 on this General Permit and has determined that it is not a major rule pursuant to that Order.

Paperwork Reduction Act [44 U.S.C. 3501 et seq.] The EPA has reviewed the requirements imposed on regulated facilities in the General Permit and finds them consistent with the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

Regulatory Flexibility Act [5 U.S.C. 601 et seq.] The Regulatory Flexibility Act (RFA) requires that EPA prepare an initial regulatory flexibility analysis for rules subject to the requirements of the Administrative Procedures Act [APA, 5 U.S.C. 553] that have a significant impact on a substantial number of small entities. However, EPA has concluded that NPDES General Permits are not rulemakings under the APA, and thus not subject to APA rulemaking requirements or the RFA.

Unfunded Mandates Reform Act: Section 201 of the Unfunded Mandates Reform Act (UMRA), Public Law 104-4, generally requires Federal agencies to assess the effects of their regulatory actions (defined to be the same as rules subject to the RFA) on tribal, state, and local governments, and the private sector. However, General NPDES Permits are not rules subject to the requirements of the APA, and are, therefore, not subject to the UMRA.

Appeal of Permit: Any interested person may appeal the General Permit in the Federal Court of Appeals in accordance with section 509(b)(1) of the Clean Water Act, 33 U.S.C. 1369(b)(1). This appeal must be filed within 120 days of the General Permit issuance date. Affected persons may not challenge the conditions of the General

Permit in further EPA proceedings (see 40 CFR 124.19). Instead, they may either challenge the General Permit in court or apply for an individual NPDES permit.

Authority: This action is taken under the authority of Section 402 of the Clean Water Act as amended, 42 U.S.C. 1342.

Dated: June 9, 2016.

Director, Office of Water and Watersheds, Region 10.

SUPPLEMENTARY INFORMATION:

I. Information About the Document

Climate change impacts are diverse, long-term, and not easily predictable. Adapting to climate change requires making context specific and forward-looking decisions regarding a variety of climate change impacts and vulnerabilities when the future is highly uncertain. EPA scientists and their collaborators created an assessment tool to help cities identify climate change risks in eight different municipal sectors. The report identifies and tests indicators of traits that may enhance or inhibit communities' resilience to climate change, allowing decision-makers to focus planning efforts on those areas that are least resilient to anticipated impacts. The results yielded an approach that provides a way for cities to explore threats to and measures

of resilience. It also demonstrates the utility of this systematic and flexible method in providing useful information for future adaptation planning for different types of cities.
