The Magnuson-Stevens Fishery Conservation and Management Act requires that the Secretary of Commerce maintain a cost recovery program to cover part of the management, data collection, and enforcement costs of the limited access privilege programs, such as the Pacific coast groundfish fishery's trawl rationalization program. This cost recovery program requires fish sellers to submit fees to fish buyers who then submit those fees to the National Marine Fisheries Service (NMFS) and include information about the volume and value of groundfish. Information is collected from monthly and annual reports as well as non-payment documents when necessary.

This program is authorized under the Pacific coast groundfish fishery regulations, trawl rationalization cost recovery program at 50 CFR 660.115.

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of Puerto Rico and the U.S. Virgin Islands; Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of an application for an exempted fishing permit; request for comments.

SUMMARY: NMFS announces the receipt of an application for an exempted fishing permit (EFP) from Puerto Rico's Department of Natural and Environmental Resources (PR DNER). If granted, the EFP would authorize the PR DNER to conduct two projects in waters

of the Puerto Rico exclusive economic zone (EEZ) to collect fishery-independent data on the abundance, distribution, and reproductive condition of reef fish in eastern and western Puerto Rico. For the first project, the EFP would authorize the PR DNER to harvest reef fish by hook-and-line and bottom longline gear off both the west and east coasts of Puerto Rico. All reef fish, including undersized and seasonally prohibited reef fish species, would be retained, except for goliath grouper, Nassau grouper, and all species of parrotfish. The purpose of the EFP for the first project is to determine spatial and temporal variations in stock abundance of Caribbean reef fish resources off Puerto Rico.

The second project in the EFP would authorize the PR DNER to collect various species of recreationally important reef fish by spear gun and hook-and-line fishing in Federal waters off the west coast of Puerto Rico. The purpose of the second project is to obtain information about the annual reproductive cycle and minimum size of sexual maturation of the collected reef fish species.

DATES: Comments must be received no later than July 28, 2016.

ADDRESSES: You may submit comments on the application by either of the following methods:

- *Email:* Maria.Lopez@noaa.gov.

Include in the subject line of the email comment the following document identifier: "PR DNER_EFP 2016".

- *Mail:* Maria del Mar Lopez, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701.

The application and related documents are available for review upon written request to any of the above addresses.

FOR FURTHER INFORMATION CONTACT: Maria del Mar Lopez, telephone: 727-824-5305, email: Maria.Lopez@noaa.gov.

SUPPLEMENTARY INFORMATION: The EFP is requested under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), and regulations at 50 CFR 600.745(b) concerning exempted fishing.

The proposed collection for scientific research involves activities that would otherwise be prohibited by regulations at 50 CFR part 622, as they pertain to Caribbean reef fish managed by the Caribbean Fishery Management Council (Council). The EFP would exempt this research activity from Federal regulations at § 622.435(a) (Seasonal and
