SUPPLEMENTARY INFORMATION: MCRC Brooklyn encompasses approximately 70 acres of the 19,000-acre Jamaica Bay Unit of the National Park Service (NPS) Gateway National Recreation Area (NRA). MCRC Brooklyn is on the southernmost end of Floyd Bennett Field. Floyd Bennett Field was formerly U.S. Naval Air Station Brooklyn, New York, and was used from World War II until 1967, prior to its decommissioning in 1971.

Subsequently, the majority of the 1,450-acre property was transferred from the Department of Defense (DoD) to the U.S. Coast Guard and the NPS, a bureau of the Department of the Interior. The Navy retained the southern portion of Floyd Bennett Field and a series of parcel transfers deeded the property to MARFORRES in 1998 for continued use as MCRC Brooklyn. The remainder of Floyd Bennett Field is owned and managed by NPS as part of the Gateway NRA. All utilities, roads, and other infrastructure necessary for the installation require crossing NPS lands; therefore, the Department of Navy executes, on behalf of MARFORRES,

any necessary permits with NPS for rights-of-way on NPS lands.

Gateway NRA is the nation's first urban national recreation area. It was established in 1972, is twice the size of Manhattan, and is divided into three administrative units: Jamaica Bay, Sandy Hook, and Staten Island. Gateway NRA has 27,025 acres of open bays, ocean, marsh islands, shoreline, dunes, maritime and successional forests, grasslands, mudflats, and open spaces. It includes marinas, greenways, campgrounds, trails, beaches, picnic grounds within historic landscapes, the remains of coastal defense works, rare structures from aviation history, and the oldest continuously operating lighthouse in the United States.

Due to an overall reduction in reserve forces, MARFORRES has examined options to consolidate training to optimize operational funds. MCRC Brooklyn is considered a highly valuable site by MARFORRES due to its potential for hosting additional units, centralized location, excess capacity, and size of its facilities. As such, MARFORRES continues to invest in modernization and renovation activities at MCRC Brooklyn. The environmental impacts from ongoing activities were analyzed in previous NEPA documents, and are therefore not part of the Proposed Action being addressed in this EA but are included in the cumulative effects analysis. Previously evaluated projects at MCRC Brooklyn include the following:

- Renovate the interior of the MCRC Brooklyn Administration Building, the original vehicle maintenance facility (VMF), and the existing Technical Storage Warehouse. Interior renovations include upgraded utilities and reconfiguration of offices.
- Construct a new VMF (currently under construction).
- Install two temporary armories (440 square feet each) in the tactical vehicle area and a covered weapons cleaning area.
- Install a 100-kilowatt (kW) demand response metering system. This system will help MARFORRES capture energy usage and savings for the installation.

Purpose And Need: The purpose of the Proposed Action is to consolidate existing MARFORRES facilities in the greater New York City metropolitan region to allow MARFORRES to optimize training through integrated unit training opportunities, and reduce costs from the operation of underutilized reserve centers. The Proposed Action is needed to improve long-term sustainable unit readiness through coordinated training, and prepare for future mission requirements.

To complete training requirements, the buildings, utilities, and assets on MCRC Brooklyn require ongoing maintenance and utilities upgrades. Infrastructure on the installation is aging and requires capital investment to address deficiencies in the buildings and meet current and future mission requirements.
