

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart Q—Iowa

■ 2. In § 52.820 the table in paragraph (c) is amended by revising the entry for

“Chapter V” under the heading “Polk County” to read as follows:

§ 52.820 Identification of plan.

Significant New Use Rules on Certain Chemical Substances; Correction
AGENCY: Environmental Protection Agency (EPA).
ACTION: Final rule; correction.

SUMMARY: EPA issued a final rule in the *Federal Register* of May 16, 2016 for 55 chemical substances that were the subject of premanufacture notices (PMNs). For the chemical substance identified generically as aluminum calcium oxide salt (PMN P–15–328), EPA inadvertently omitted the *de minimus* exemption from the worker protection requirements. Also for the same chemical substance, a typographical error has been identified within the hazard communication program requirements. This document

corrects the omission and the typographical error.
DATES: This correction is effective July 15, 2016.
ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPPT–2015–0810, is available at <http://www.regulations.gov> or at the Office of Pollution Prevention and Toxics Docket (OPPT Docket), Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPPT Docket is (202) 566–0280. Please review the visitor instructions and additional information about the docket available at <http://www.epa.gov/dockets>.
FOR FURTHER INFORMATION CONTACT: *For technical information contact:* Kenneth Moss, Chemical Control Division, Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (202) 564–9232; email address: moss.kenneth@epa.gov.

For general information contact: The TSCA–Hotline, ABVI–Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: TSCA-Hotline@epa.gov.

SUPPLEMENTARY INFORMATION:
I. Does this action apply to me?
The Agency included in the May 16, 2016 final rule a list of those who may be potentially affected by this action.

II. What does this correction do?
EPA issued a final rule in the *Federal Register* of May 16, 2016 (81 FR 30477) (FRL–9944–77) for significant new uses for 55 chemical substances that were the subject of PMN notices. EPA omitted the *de minimus* exemption of 1.0% from the worker protection requirements for § 721.10908(a)(2)(i). EPA also, within the hazard communication program requirements for § 721.10908(a)(2)(ii), misspelled a word. In that section, the word “trough” should read “through.” This action corrects the omission and the typographical error.

III. Why is this correction issued as a final rule?
Section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)(3)(B)) provides that, when an

Agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, the Agency may issue a final rule without providing notice and an opportunity for public comment. EPA has determined that there is good cause for making this correction final without prior proposal and opportunity for comment. The TSCA section 5(e) consent order for P-15-378 that is the basis for the SNUR at § 721.10908 contains the *de minimus* exemption of 1.0% that is missing from the worker protection requirements for § 721.10908(a)(2)(i). The typographical error corrects a spelling mistake for the word "through." EPA finds that this constitutes good cause under 5 U.S.C. 553(b)(3)(B).

IV. Do any of the statutory and Executive Order reviews apply to this action?

No. For a detailed discussion concerning the statutory and executive order review, refer to Unit XII. of the May 16, 2016 final rule.

V. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

In FR Doc. 2016-11121, published in the **Federal Register** of May 16, 2016 (81 FR 30452), make the following correction:

- 1. On page, 30477, in the second and third columns, in § 721.10908, paragraphs (a)(2)(i) introductory text and (a)(2)(ii) are corrected to read as follows:

§ 721.10908 Aluminum calcium oxide salt (generic).

- (a) * * *
- (2) * * *

(i) *Protection in the workplace.*

Requirements as specified in § 721.63(a)(4), (a)(6)(ii), (a)(6)(v), (a)(6)(vi), (b) (concentration set at 1.0 percent), and (c). When determining which persons are reasonably likely to be exposed as required for § 721.63(a)(4), engineering control measures (*e.g.*, enclosure or confinement of the operation, general and local ventilation) or administrative control measures (*e.g.*, workplace policies and procedures) shall be considered and implemented to prevent exposure, where feasible. The following

National Institute for Occupational Safety and Health (NIOSH)-certified respirators with an Assigned Protection Factor (APF) of at least 10 meet the requirements of § 721.63(a)(4):

* * * * *

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a) through (f)(concentration set at 1.0 percent), (g)(1)(ii), (g)(2) (When using this substance avoid breathing the substance, and use respiratory protection, or maintain workplace airborne concentrations at or below an 8-hour time-weighted average of 5 mg/m³.) and (g)(5).

Atlantic Highly Migratory Species; Commercial Aggregated Large Coastal Shark and Hammerhead Shark Management Group Retention Limit Adjustment

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason retention limit adjustment.

SUMMARY: NMFS is adjusting the commercial aggregated large coastal shark (LCS) and hammerhead shark management group retention limit for directed shark limited access permit holders in the Atlantic region from 3 LCS other than sandbar sharks per vessel per trip to 45 LCS other than sandbar sharks per vessel per trip. This action is based on consideration of the regulatory determination criteria regarding inseason adjustments. The retention limit will remain at 45 LCS other than sandbar sharks per vessel per trip in the Atlantic region through the

rest of the 2016 fishing season or until NMFS announces via a notice in the **Federal Register** another adjustment to the retention limit or a fishery closure. This retention limit adjustment affects anyone with a directed shark limited access permit fishing for LCS in the Atlantic region.

DATES: This retention limit adjustment is effective on July 15, 2016, through the end of the 2016 fishing season on December 31, 2016, or until NMFS announces via a notice in the **Federal Register** another adjustment to the retention limit or a fishery closure, if warranted.

FOR FURTHER INFORMATION CONTACT: Guý DuBeck or Karyl Brewster-Geisz 301-427-8503; fax 301-713-1917.

SUPPLEMENTARY INFORMATION: Atlantic shark fisheries are managed under the 2006 Consolidated Highly Migratory Species (HMS) Fishery Management Plan (FMP), its amendments, and implementing regulations (50 CFR part 635) issued under authority of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*).

Atlantic shark fisheries have separate regional (Gulf of Mexico and Atlantic) quotas for all management groups except for the shark research fishery for LCS and sandbar sharks, blue shark, porbeagle shark, and pelagic shark (other than porbeagle or blue sharks) management groups. The boundary between the Gulf of Mexico region and the Atlantic region is defined at § 635.27(b)(1) as a line beginning on the East Coast of Florida at the mainland at 25°20.4' N. lat, proceeding due east. Any water and land to the north and east of that boundary is considered, for the purposes of quota monitoring and setting of quotas, to be within the Atlantic region. This inseason action only affects the aggregated LCS and hammerhead shark management groups in the Atlantic region.

Under § 635.24(a)(8), NMFS may adjust the commercial retention limit in the shark fisheries during the fishing season. Before making any adjustment, NMFS must consider specified regulatory criteria and other relevant factors. (*See* 635.24(a)(8)(i)-(vi)). After considering these criteria as discussed below, NMFS has concluded that increasing the retention limit of the Atlantic aggregated LCS and hammerhead management groups for directed shark limited access permit holders will allow use of available aggregated LCS and hammerhead shark management group quotas and will provide fishermen throughout the Atlantic region equitable fishing
