

that for these filers submitting both Component 1 and 2 data in 2017 and 2018, the *addition* of pay data will increase the estimated annual burden hour costs by a total of \$25,364,064.80 or an average of \$416.58 per EEO-1 filer each year. This burden estimate includes reading instructions and collecting, merging, validating, and reporting the data electronically.

• *One-Time Implementation Burden:*

The 60-Day Notice estimated the one-time implementation burden hour cost associated with submitting the information required by Component 2 of the revised EEO-1 Report to be \$23,000,295. This was based on the one-time cost for developing queries related to Component 2 in an existing HRIS, which was estimated to take 8 hours per filer at a wage rate of \$47.22 per hour.

Employers filing public comments stated that bridging pay and HRIS

systems, or purchasing software updates from vendors, would be extremely expensive. Some of these employers estimated the one-time implementation cost of bridging HRIS and payroll records to report Component 2 data estimated costs could range from \$5,000 per firm to \$20,000, \$30,000, or \$40,000 per firm. Although the estimates did not provide details explaining how *they* were calculated, the EEOC has considered this feedback and increased the one-time implementation burden. It has done so by reflecting that specialized computer software experts with a higher wage rate will be required to do the work necessary to implement the one-time changes required for this proposal.

Using an hourly wage rate for a computer programmer of \$55.81, the EEOC now estimates one-time burden hour cost of \$27,184,381.28.¹²²

Summary: The Commission will consider a document that would make spectrum in bands above 24 GHz available for flexible use wireless services, including for next-generation, or 5G, networks and technologies.
2	Wireline Competition	Title: Technology Transitions (GN Docket No. 13-5); USTelecom Petition for Declaratory Ruling that Incumbent Local Exchange Carriers Are Non-Dominant in the Provision of Switched Access Services (WC Docket No. 13-3); Policies and Rules Governing Retirement of Copper Loops by Incumbent Local Exchange Carriers (RM-11358). estimated hours spent by each job in completing the report to arrive at a per-firm cost for firm-level functions of approximately \$510.76 and a per-report cost for establishment-level functions of approximately \$39.66 (these figures are rounded). The burden hour cost for firm-level functions is \$31,098,011.6 and the burden hour cost for establishment-level functions is \$26,738,315.7. Firms using data upload are estimated to save \$4,289,968.22 (data entry clerk hourly wage rate of \$13.69 × 0.95 hours × 329,858 reports filed by data upload). Total firm-level burden hour cost of

\$31,098,011.6 + total establishment-level burden hour cost of \$26,738,315.7 – cost savings from data upload of \$4,289,968.22 = a total annual burden hour cost of \$53,546,359.08.

¹²² This estimate is calculated as follows: 8 hours per respondent × 60,886 employers = 487,088 × \$55.81 per hour = \$27,184,381.28. The higher one-time implementation burden estimate in this Notice as compared to the one-time implementation burden estimate in the 60-Day Notice is due to the higher wage rate for the computer programmer, multiplied by 1.46, which is the employer

contribution for “management, professional, related.” U.S. Dept. of Labor, Bureau of Labor Statistics, *Occupational Outlook Handbook: Computer Programmers*, <http://www.bls.gov/ooh/computer-and-information-technology/computer-programmers.htm>; see also U.S. Dept. of Labor, Bureau of Labor Statistics, *Employer Costs for Employee Compensation—Dec. 2015* (Mar. 2016), http://www.bls.gov/news.release/archives/eccec_03102016.htm (computing the rate of employer contribution by dividing total compensation by total salary).
