SUPPLEMENTARY INFORMATION:

Docket: Supporting documents, including the ICR that explains in detail the information collection activities and the related burden and cost estimates that are summarized in this document, are available in the docket for this ICR. The docket can be viewed online at <http://www.regulations.gov> or in person at the EPA Docket Center, West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is (202) 566–1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

ICR status: This ICR is currently scheduled to expire on July 31, 2016. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Under PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Section 5 of the Toxic Substances Control Act (TSCA) provides EPA with a regulatory mechanism to monitor and, if necessary, control significant new uses of chemical substances. Section 5 authorizes EPA to determine by rule (*i.e.*, a significant new use rule or SNUR), after considering all relevant factors, that a use of a chemical substance represents a significant new use. If EPA determines that a use of a chemical substance is a significant new use, section 5 requires persons to submit a significant new use notice (SNUN) to EPA at least 90 days before they manufacture, import, or process the substance for that use.

EPA uses the information obtained through this collection to evaluate the health and environmental effects of the significant new use. EPA may take regulatory actions under TSCA section 5, 6 or 7 to control the activities for which it has received a SNUR notice. These actions include orders to limit or prohibit the manufacture, importation, processing, distribution in commerce, use or disposal of chemical substances. If EPA does not take action, section 5 also requires EPA to publish a **Federal Register** notice explaining the reasons for not taking action. This information collection addresses the reporting and recordkeeping requirements inherent in TSCA section 5 significant new use rules.

Respondents may claim all or part of their submission as confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Form Numbers: EPA Form No. 7710–25.

Respondents/affected entities: Entities potentially affected by this ICR are companies that manufacture, process, import, or distribute in commerce chemical substances or mixtures.

Respondent's obligation to respond: Mandatory (40 CFR part 721).

Estimated number of respondents: 6 (total).

Frequency of response: On occasion.

Total estimated burden: 1,025 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$100,595 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 289 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase reflects EPA's updating the number of affected sites, the average number of SNUNs submitted annually, recalculating the

average number of chemicals per SNUR, and correcting rounding errors in the burden estimate for completing a SNUN and rule familiarization. This change is an adjustment.

Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

B. How can I get copies of documents related to this meeting?

EPA has established two dockets for the meetings: For the meeting on the process for risk evaluation, use docket ID No. EPA-HQ-OPPT-2016-0400; and for the meeting on the process of chemical prioritization for risk evaluation, use docket ID No. EPA-HQ-OPPT-2016-0399. Both dockets are available either online at <http://www.regulations.gov> or in person at the Office of Pollution Prevention and Toxics Docket (OPPT Docket), Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. Documents and meeting information will also be available at the registration Web site.

II. Background

On June 22, 2016, President Obama signed into law the Frank R. Lautenberg Chemical Safety for the 21st Century Act, which amended the Toxic Substances Control Act of 1976. The revised TSCA includes provisions that require EPA to develop by rule processes for risk evaluation and chemical prioritization for risk evaluation. Additional information on the revisions to TSCA can be found at [https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/frank-r-](https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/frank-r-lautenberg-chemical-safety-21st-century-act)

[lautenberg-chemical-safety-21st-century-act](https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/frank-r-lautenberg-chemical-safety-21st-century-act).

Risk evaluation. The meeting on August 9, 2016 will be for the purpose of gathering information for EPA consideration in developing the rule required under TSCA section 6(b)(4). Under TSCA section 6(b)(4), not later than 1 year after the date of enactment (*i.e.*, by June 21, 2017), EPA is required to establish by rule a process to conduct risk evaluations to determine whether a chemical substance presents an unreasonable risk of injury to health or the environment.

Prioritization for risk evaluations. The meeting on August 10, 2016 will be for the purpose of gathering information for EPA consideration in developing the rule required under TSCA section 6(b)(1). Under TSCA section 6(b)(1), EPA must within 1 year of enactment (*i.e.*, by June 21, 2017) establish by rule a risk-based screening process, including criteria for designating chemical substances as high-priority for risk evaluations or low-priority for which risk evaluations are not warranted at the time.

III. Meeting

A. Remote Access

The meetings will be accessible remotely for registered participants. Registered participants will receive information on how to connect to the meetings prior to their start.

B. Public Participation at the Meeting

Members of the public may register to attend the meetings as observers and may also register to provide oral comments on the days of the meetings. A registered speaker is encouraged to focus on issues directly relevant to the particular meeting's subject matter. Each speaker is allowed no more than 5 minutes in each meeting. To accommodate as many registered speakers as possible, speakers may present oral comments only, without visual aids or written material. Persons registered to speak (as well as others) may submit written materials to the dockets as described under **ADDRESSES**.

IV. How can I request to participate in this meeting?

A. Registration

To attend a meeting in person or to receive remote access, please register no later than August 4, 2016, using one of the methods described under **ADDRESSES**. While on-site registration will be available, seating will be on a first-come, first-served basis, with priority given to early registrants, until room capacity is reached. The Agency

anticipates that approximately 150 people will be able to attend each of the meetings in person. For registrants not able to attend in person, the meetings will also provide remote access capabilities; registered participants will be provided information on how to connect to the meetings prior to their start.

B. Required Registration Information

Members of the public may register to attend as observers or speak if planning to offer oral comments during the scheduled public comment periods. To register for the meetings online, you must provide your full name, organization or affiliation, and contact information.

SUPPLEMENTARY INFORMATION: The current guidance document for human exposure assessment, *Guidelines for Exposure Assessment*, was published in 1992, reflecting the state-of-the-science in the 1970s and 1980s. Since its publication, the field of exposure

science has undergone significant transformation in methods and approaches, which EPA has incorporated into its policies and practices to better align with the current state-of-the-science. The 1992 guidelines are being updated to reflect the advancement in exposure science and assessment and Agency policies.

The draft guidelines benefit from over two decades of experience with EPA assessments conducted by Agency programs under their respective authorities and constraints, and from input from external panels, including the National Academy of Sciences and EPA's Science Advisory Board. This draft document builds on topics covered in the 1992 exposure guidelines including planning and scoping for an assessment, data acquisition and use, modeling, and considerations of uncertainty in exposure assessment. It also includes new material on planning and conducting an observational human exposure measurement study and considerations of lifestyles and sensitive populations in exposure assessments. These draft guidelines present the most current science used in EPA exposure assessments and incorporates information about the Agency's current policies.
