

for the CWA or regulations, nor are they regulations themselves. EPA's recommended criteria do not impose legally binding requirements. States and authorized tribes have the discretion to adopt, where appropriate, other scientifically defensible water quality criteria that differ from these recommendations.

III. What is estuarine/marine copper and why is EPA concerned about it?

Copper is an abundant trace element that occurs naturally in the earth's crust and surface waters. It is a nutrient that is essential to aquatic organisms at low concentrations, but is toxic to aquatic organisms at higher concentrations. In addition to acute effects such as mortality, chronic exposure to copper can lead to adverse effects on survival, growth, reproduction as well as alterations of brain function, enzyme activity, blood chemistry, and metabolism in aquatic organisms. Copper is commonly found in aquatic systems as a result of both natural and anthropogenic sources. Natural sources of copper in aquatic systems include geological deposits, volcanic activity, and weathering and erosion of rocks and soils. Anthropogenic sources of copper include mining activities, agriculture, metal and electrical manufacturing, sludge from publicly-owned treatment works (POTWs), pesticide use and more. A major source of copper in the marine environment is antifouling paints, used as coatings for ship hulls, buoys, and underwater surfaces, and as a legacy contaminant from decking, pilings and some marine structures that used chromated copper arsenate (CCA) treated timbers.

IV. Information on the Draft Document

The 2016 draft recommended update uses the saltwater biotic ligand model (BLM), a bioavailability model that relies on water quality input parameters, to estimate copper criteria protective of aquatic life in estuarine/marine environments. The BLM allows users to determine criteria values based on site-specific water quality variables (temperature, pH, dissolved organic carbon, and salinity) that influence the bioavailability and toxicity of copper in estuarine/marine environments. EPA has included new acute toxicity data for estuarine/marine species in the 2016 draft recommended update. EPA used a total of 74 genera to derive the estuarine/marine criterion maximum concentration (CMC) in the 2016 update compared to the 44 genera EPA used in EPA's 2003 draft estuarine/marine criteria for copper. Incorporation of the BLM accounts for copper bioavailability

in natural aquatic systems, in contrast to the 2003 draft criteria which did not account for the interactions of these parameters on copper bioavailability and their effect on copper toxicity.

V. Solicitation of Scientific Views

EPA is soliciting additional scientific views, data, and information regarding the science and technical approach used in the derivation of the draft document.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is

publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Paid Feeding Assistants in Long-Term Care Facilities and Supporting Regulations; *Use:* In accordance with 42 CFR part 483, long-term care facilities are permitted to use paid feeding assistants to supplement the services of certified nurse aides. If facilities choose this option, feeding assistants must complete a training program. Nursing home providers are expected to maintain a record of all individuals used by the facility as paid feeding assistants. *Form Number:* CMS-10053 (OMB control number: 0938-0916); *Frequency:* Occasionally; *Affected Public:* Private Sector—Business or other for-profit and not-for-profit institutions; *Number of Respondents:* 4,250; *Total Annual Responses:* 4,250; *Total Annual Hours:* 25,500. (For policy questions regarding this collection contact Karen Tritz at 410-786-8021.)

2. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Collection Requirements for Compendia for Determination of Medically-accepted Indications for Off-label Uses of Drugs and Biologicals in an Anti-cancer Chemotherapeutic Regimen *Use:* Section 182(b) of the Medicare Improvement of Patients and Providers Act (MIPPA) amended section 1861(t)(2)(B) of the Social Security Act (42 U.S.C. 1395x(t)(2)(B)) by adding at the end the following new sentence: 'On and after January 1, 2010, no compendia may be included on the list of compendia under this subparagraph unless the compendia has a publicly transparent process for evaluating therapies and for identifying potential conflicts of interest.' We believe that the implementation of this statutory provision that compendia have a "publicly transparent process for evaluating therapies and for identifying potential conflicts of interests" is best accomplished by amending 42 CFR 414.930 to include the MIPPA requirements and by defining the key components of publicly transparent processes for evaluating therapies and for identifying potential conflicts of interests.

All currently listed compendia will be required to comply with these provisions, as of January 1, 2010, to remain on the list of recognized compendia. In addition, any compendium that is the subject of a
