**FOR FURTHER INFORMATION CONTACT:** Sara Young or Amy Sloan, (301) 427-8401.

**SUPPLEMENTARY INFORMATION:** The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The applicant proposes to study the thermoregulatory strategies (insulation, thermogenic mechanisms) by which Weddell seal pups maintain euthermy in air and in water and examine the development of diving capability (oxygen stores) as the animals prepare for independent foraging. This study will take place near McMurdo Station in Antarctica. In each field season (two field seasons total), nine pups (18 total) will be handled at five time points between two days and eight weeks of age. Protocols not requiring sedation (mass, morphometrics, core and surface temperatures, metabolic rates) will be conducted on all nine individuals at all five time points under manual restraint. Protocols requiring anesthesia (body composition, biopsies, and blood volume analysis) will be sampled twice for each animal: Once between two days and four weeks of age, and again at six weeks; one additional anesthesia procedure will be conducted for a single blood draw at seven or eight weeks. An additional 12 pups will be handled for vibrissae sampling annually, and a second cohort of nursing pups may be handled annually if study animals are not relocated at any of the 5 time points for resampling. The applicant is also proposing to take up to 700 animals for flipper tag reading, thermal imaging, and incidental harassment due to work with conspecifics. Up to six pup mortalities are requested annually, not to exceed ten over the two field seasons. The permit would be valid for three years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to

prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.
