otherwise be inconsistent with the issue finality provisions in 10 CFR part 52. The NRC’s position is based upon the following considerations:

1. The SRP positions do not constitute backfitting, inasmuch as the SRP is internal guidance directed at the NRC staff with respect to their regulatory responsibilities.

The SRP provides guidance to the NRC staff on how to review an application for the NRC’s regulatory approval in the form of licensing. Changes in internal NRC staff guidance are not matters for which either nuclear power plant applicants or licensees are protected under either the Backfit Rule or the issue finality provisions of 10 CFR part 52.

2. The NRC staff has no intention to impose the SRP positions on current licensees and regulatory approvals either now or in the future.

The NRC staff does not intend to impose or apply the positions described in the SRP to existing (already issued) licenses and regulatory approvals. Therefore, the issuance of a final SRP—even if considered guidance that is within the purview of the issue finality provisions in 10 CFR part 52—need not be evaluated as if it were a backfit or as being inconsistent with issue finality provisions. If, in the future, the NRC staff seeks to impose a position in the SRP on holders of already issued licenses in a manner which does not provide issue finality as described in the applicable issue finality provision, then the NRC staff must make the showing as set forth in the Backfit Rule or address the criteria for avoiding issue finality as described in the applicable issue finality provision.

3. Backfitting and issue finality do not—with limited exceptions not applicable here—protect current or future applicants.

Applicants and potential applicants are not, with certain exceptions, protected by either the Backfit Rule or any issue finality provisions under 10 CFR part 52. This is because neither the Backfit Rule nor the issue finality provisions under 10 CFR part 52—with certain exclusions discussed in the next paragraph—were intended to apply to every NRC action which substantially changes the expectations of current and future applicants.

The exceptions to the general principle are applicable whenever an applicant references a 10 CFR part 52 license (e.g., an early site permit) and/or NRC regulatory approval (e.g., a design certification rule) with specified issue finality. The NRC staff does not, at this time, intend to impose the positions represented in the SRP in a manner that is inconsistent with any issue finality provisions. If, in the future, the NRC staff seeks to impose a position in the SRP in a manner which does not provide issue finality as described in the applicable issue finality provision, then the NRC staff must address the criteria for avoiding issue finality as described in the applicable issue finality provision.

III. Congressional Review Act
This SRP section revision is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

Dated at Rockville, Maryland, this 29th day of July 2016.

For the Nuclear Regulatory Commission.

Joseph Colaccino,
Chief, New Reactor Rulemaking and Guidance Branch, Division of Engineering, Infrastructure, and Advanced Reactors, Office of New Reactors.

 BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–280 and 50–281 NRC–2016–0105]

Virginia Electric Power Company;
Surry Power Station, Unit Nos. 1 and 2;
Use of AREVA’s M5® Alloy Fuel Rod Cladding Material

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an exemption in response to a September 30, 2016, request from Virginia Electric Power Company (Dominion or the licensee) in order to use AREVA’s M5® alloy fuel rod cladding material at Surry Power Station, Unit Nos. 1 and 2 (SPS).

DATES: The exemption was issued on July 27, 2016.

ADDITIONS: Please refer to Docket ID NRC–2016–0105 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

I. Background

Dominion is the holder of Facility Operating License Nos. DPR–32 and DPR–37, which authorize operation of SPS. The licenses provide, among other things, that the facility is subject to all rules, regulations, and orders of the NRC now or hereafter in effect.

The facility consists of two pressurized-water reactors (PWR) located in Surry County, Virginia.
must be provided with an ECCS that is designed to provide core cooling following a postulated LOCA. AREVA NP, in its NRC-approved Topical Report BAW–10227–A, "Evaluation of Advanced Cladding and Structural Material (M5) in PWR Reactor Fuel," February 2000 (ADAMS Accession No. ML003686365), has demonstrated that the effectiveness of the ECCS will not be affected by a change from zircaloy or ZIRLO™ clad fuel to fuel rods clad with AREVA’s M5® alloy. Normal reload safety analyses will confirm that there is no adverse impact on ECCS performance.

The objective of 10 CFR 50.46(b)(2) and (b)(3), and 10 CFR part 50, appendix K.I.A.5, is to ensure that cladding oxidation and hydrogen generation are appropriately limited during a LOCA and conservatively accounted for in the ECCS evaluation model. Appendix K of 10 CFR part 50 requires that the Baker-Just equation be used in the ECCS evaluation model to determine the rate of energy release, cladding oxidation, and hydrogen generation. AREVA NP has shown in an appendix of Topical Report BAW–10227–A that the Baker-Just model is conservative in all post-LOCA scenarios with respect to the use of AREVA’s M5® alloy fuel rod cladding material.

Based on the regulatory review of the exemption request, the NRC staff concludes that the intent of 10 CFR 50.46 and 10 CFR part 50, appendix K, will continue to be satisfied for the planned operation of SPS with AREVA’s M5® alloy fuel rod cladding material used for non-limiting LTAs and the special circumstance required by 10 CFR 50.12(a)(2)(ii) for granting of an exemption exists.

B. Authorized by Law

This exemption would allow the use of fuel rods clad with AREVA’s M5® alloy in up to eight fuel assemblies at SPS. The regulations in 10 CFR 50.12 allow the NRC to grant exemptions from the requirements of 10 CFR part 50 provided that the exemptions are authorized by law, and that granting the exemption would exist to grant the proposed exemption will not result in a violation of the Atomic Energy Act of 1954, as amended. Therefore, the exemption is authorized by law.

C. No Undue Risk to Public Health and Safety

The provisions of 10 CFR 50.46 establish acceptance criteria for ECCS performance. Topical Report BAW–10227–A contains the justification to use AREVA’s M5® alloy fuel rod cladding material, a proprietary variant of Zr1Nb, to replace Zircaloy-4 in the construction of fuel assembly components such as fuel rod cladding, guide tubes, and spacer grids. This justification is required to support the request by Dominion for an exemption to 10 CFR 50.46 to permit the use of AREVA’s M5® alloy fuel rod cladding material, in addition to Zircaloy-4 and ZIRLO™. AREVA’s M5® alloy is an AREVA NP proprietary material composed of 1.0 percent niobium, 0.125 percent oxygen, and the balance zirconium. AREVA’s M5® alloy fuel rod cladding provides improved performance in fuel cladding corrosion and hydrogen pickup.

An AREVA NP LOCA evaluation showed compliance with 10 CFR 50.46. Topical Report BAW–10227–A has addressed all of the important aspects of AREVA’s M5® alloy fuel rod cladding material with respect to ECCS performance requirements, as follows:

• Material properties of AREVA’s M5® alloy, including cladding thermal conductivity, cladding creep, clad swelling, rupture deformation, and temperature, were found to be very similar to those of Zircaloy-4.

• The retention of the Baker-Just equation for the calculation of metal-water reaction rate specified in 10 CFR part 50, appendix K, is justified to be suitably conservative.

Based on the NRC staff’s evaluation of the exemption request, the staff concludes that the intent of 10 CFR 50.46 and 10 CFR part 50, appendix K, will continue to be satisfied for the planned operation of SPS with AREVA’s M5® alloy fuel rod cladding material used in up to eight non-limiting LTAs. The probability of postulated accidents is not increased. Also, based on the NRC staff’s evaluation of the exemption request, the consequences of postulated accidents are not increased. Therefore, there is no undue risk to public health and safety due to using M5® alloy fuel cladding and fuel assembly material in up to eight non-limiting LTAs.

D. Consistent With the Common Defense and Security

The proposed exemption would allow the use of AREVA’s M5® alloy fuel rod cladding material in SPS. This change to the plant configuration is adequately controlled by technical specification.
requirements and is not related to security issues. Because the common defense and security is not impacted by this exemption, the exemption is consistent with the common defense and security.

IV. Conclusions

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a), the exemption is authorized by law, will not present an undue risk to the public health and safety, is consistent with the common defense and security, and that special circumstances are present to warrant issuance of the exemption. Therefore, the Commission hereby grants SPS an exemption from the requirements of 10 CFR 50.46 and 10 CFR part 50, appendix K, paragraph I.A.5, to allow the use of AREVA’s M5® alloy fuel rod cladding material in up to eight non-limiting LTAs at SPS.

Pursuant to 10 CFR 51.32, an environmental assessment and finding of no significant impact related to this exemption was published in the Federal Register on May 31, 2016 (81 FR 34382). Based upon the environmental assessment, the Commission has determined that issuance of this exemption will not have a significant effect on the quality of the human environment.

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 27th day of July 2016.

For the Nuclear Regulatory Commission.

Anne T. Boland,
Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7710–FW–P

POSTAL REGULATORY COMMISSION

New Postal Product

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing concerning minor classification changes to the Country Price Lists for International Mail. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: Comments are due: August 4, 2016.

ADDRESSES: Submit comments electronically via the Commission’s Filing Online system at http://www.prc.gov. Those who cannot submit comments electronically should contact the person identified in the FOR FURTHER INFORMATION CONTACT section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents
I. Introduction
II. Notice of Commission Action
III. Ordering Paragraphs

I. Introduction

On July 27, 2016, the Postal Service filed a notice of a minor classification change regarding the Country Price Lists for International Mail in Part D of the Mail Classification Schedule (MCS), under Commission rules 39 CFR 3020.90 and 3020.91.† The Postal Service also presents proposed changes to the MCS. Notice at 2; Attachment 1. The Postal Service states that the proposed changes are minor in nature and are not inconsistent with 39 U.S.C. 3642. Notice at 3.

MCS change. The Postal Service plans to provide outbound Priority Mail Express International (PMEI) service to Cuba. Id. at 1. Accordingly, the Postal Service seeks to assign Country Group 9 to Cuba for variable weight PMEI and Country Group 8 to Cuba for PMEI Flat Rate Envelope. Id. at 2.

II. Notice of Commission Action

Pursuant to 39 CFR 3020.92, the Commission has posted the Notice on its Web site and invites comments on whether the Postal Service’s filings in Docket No. MC2016–172 are consistent with the policies of 39 U.S.C. 3642 and 39 CFR 3020 subpart E. Comments are due no later than August 4, 2016. The public portions of these filings can be accessed via the Commission’s Web site (http://www.prc.gov).

The Commission appoints Katrina R. Martinez to represent the interests of the general public (Public Representative) in this docket.

III. Ordering Paragraphs

IT IS ORDERED:

1. The Commission establishes Docket No. MC2016–172 to consider matters raised by the Notice.

2. Pursuant to 39 U.S.C. 505, Katrina R. Martinez is appointed to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this proceeding.

3. Comments by interested persons are due by August 4, 2016.

4. The Secretary shall arrange for publication of this order in the Federal Register.

By the Commission.

Stacy L. Ruble,
Secretary.

† Notice of United States Postal Service of Minor Classification Change, July 27, 2016 (Notice).

3 As described below, the Performance Committee would be renamed as the Compensation and Performance Committee.
