

The purpose of this information collection is to document and track clinical inquiries made to the CDC EOC call center and to systematically collect standardized clinical/demographic/epidemiological information about suspected cases. The emergency clearance for this information collection dealt specifically with Zika-related

clinical inquiries. However, the new ICR will cover this project for any EOC activation. Regardless of the disease or hazard being responded to, the EOC operates this call center to answer and respond to clinical inquiries. This information collection is a necessary part of operating this call center and responding to emergency situations.

These information collections will align with their legislative authority, Section 301 of the Public Health Service Act (42 U.S.C. 241). There are no total costs to the respondents other than their time. The total annualized burden requested is 305 hours.

SUPPLEMENTARY INFORMATION:

Agenda: On September 20 and 21, 2016, the Committee will discuss and make recommendations regarding the classification of certain wound care products containing antimicrobials and other drugs as part of the routine process for device classification. These products are regulated under product code FRO, “Dressing, Wound, Drug,” and are considered “pre-amendments” because they were in commercial distribution prior to May 28, 1976, when the Medical Devices Amendments were enacted, and have not yet been classified under section 513 of the Federal Food, Drug, and Cosmetic Act.

As a part of the classification process, FDA is seeking committee input on the indications for use, risks to health, and safety and effectiveness of these wound

care products, and how they should be classified. They may be classified in class I (general controls), class II (special and general controls), or class III (premarket approval (PMA), requiring demonstration of safety and effectiveness for each product).

FDA believes some of these products may meet the definition of class II whereas others may meet the definition of class III in light of their intended use, composition, the extent of evidence of clinical benefit, and the risks they pose. For the subset of these products that contain antibiotics, FDA appreciates the importance of appropriately addressing the risk of antimicrobial resistance (AMR) in light of the increasingly significant national public health concern posed by AMR. FDA is also aware of differences in the claims made for some products even though they may be regulated in the same manner.

FDA intends to make background material available to the public on its Web site at least 2 business days before the meeting. If FDA is unable to post the background material on its Web site prior to the meeting, the background material will be made publicly available at the location of the meeting, and the background material will be posted on FDA’s Web site after the meeting. Background material will be available at <http://www.fda.gov/AdvisoryCommittees/Calendar/default.htm>. Scroll down to the appropriate advisory committee meeting link.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person on or before September 6, 2016. Oral presentations from the public will be scheduled between approximately 1 p.m. and 2 p.m. on September 20 and between approximately 9 a.m. and 10:30 a.m. on September 21, 2016. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before August 26, 2016. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will

notify interested persons regarding their request to speak by August 29, 2016.

Persons attending FDA’s advisory committee meetings are advised that the Agency is not responsible for providing access to electrical outlets.

FDA is establishing a docket for public comment on this document. The docket number is FDA-2016-N-2147. The docket will close on October 20, 2016. Comments received on or before September 1, 2016, will be provided to the committee. Comments received after that date will be taken into consideration by the Agency.
