As part of the Department's Digital Economy Agenda, the National Telecommunications and Information Administration (NTIA) initiated an inquiry regarding the Internet of Things (IoT) to review the current technological and policy landscape, which included a Request for Comment on "The Benefits, Challenges, and Potential Roles for the Government in Fostering the Advancement of the Internet of Things."¹ This workshop will build on

the comments received in the Request for Comment, focusing specifically on the potential benefits and challenges of these technologies and what role, if any, the U.S. Government should play in this area. This workshop will help to inform the Department's forthcoming issue-spotting, agenda-setting green paper on IoT.

NTIA will post a detailed agenda on its Web site, www.ntia.doc.gov/category/internet-things, prior to the meeting. The workshop will consist of a number of panels and speakers that will explore in more depth the obstacles and opportunities raised by commenters on the federal government's role in IoT deployment. Agenda topics and format are subject to change.

identifying customers and determining if the CFTC's SmartCheckSM campaign is helping them to identify, avoid, and report financial fraud.

Title: CFTC SmartCheck Annual Campaign Impact Tracking Survey, (OMB Control No. 3038-NEW). This is a request for approval of a new collection.

Abstract: In 2010, the Dodd-Frank Act¹ expanded the Commission's authority to, among other matters related to regulatory oversight, establish funding of consumer education initiatives under its new Whistleblower authority.² Under this new authority, the Commission established the OCEO to, among other efforts, survey the public regarding consumer education initiatives.³ This notice announces a public survey. This survey will include screening questions to identify the

correct respondents and questions to determine if the CFTC's SmartCheckSM campaign is helping customers identify, avoid, and report financial fraud.

The OCEO will use the information collected in the survey to refine the methods used to inform the public about how to best detect and report financial fraud. This will be done by creating a final summary report that includes key findings from the survey.

Findings from the summary report will be used to directionally inform the outreach efforts that the CFTC undertakes concerning helping customers avoid financial fraud.

The survey will be administered using an online survey tool. The online modality approach will allow presentation of test material to participants in a more convenient and time-efficient manner than other

collection methods such as mail intercepts. The online method also allows for a quicker turnaround for data collection. No other collection methods will be used.

Burden Statement: The screening questions will take about 1 minute to complete. It is anticipated that 4,000 people will be screened. The survey will take about 15 minutes. The cost of the screener survey will be approximately \$3,125, which equates to \$46.85 per burden hour. 2,000 people will take the 15 minute survey. The cost of the full survey will be approximately \$46,875, which equates to \$93.75 per burden hour. Based on these assumptions, the total burden hours will be 566.7 hours. The Commission estimates the average burden of this collection of information as follows:

ESTIMATED ANNUAL REPORTING BURDEN HOURS

	Annual reporting	Frequency of reporting	Hours per report	Total	
17 CFR 165.12	4,000	1 response per respondent.	1 minute per response	4,000	66.7 hours total burden.
17 CFR 165.12	2,000	1 response per respondent.	15 minutes per response	2,000	500 hours total burden.
