Abstract: EPA's Office of Land and Emergency Management Sustainable Food Management (SFM) program is designed to advance sustainable food management practices throughout the United States by preventing and diverting wasted food from landfills. The focal point of the SFM program is the Food Recovery Challenge in which organizations pledge to improve their sustainable food management practices. The success of the SFM program efforts to divert wasted food from landfills requires sufficient capacity to process the diverted materials which includes composting and anaerobic digestion operations. In addition to increasing opportunity to process wasted food diverted from the municipal solid waste stream, anaerobic digesters achieve social, environmental and economic benefits, such as generation of renewable energy, reduction of methane emissions, and opportunities to improve soil health through the production of soil amendments. The SFM program supports these efforts by educating state and local governments and communities about the benefits of wasted food diversion. The SFM program also builds partnerships with state agencies and other strategic partners interested in developing organics recycling capacity and provides tools to assist organizations in developing anaerobic digestion (AD) projects.

This information collection consists of a request for data not currently available on AD facilities processing wasted food as well as a review and update of the existing SFM AD facility inventory. Correspondence will include an electronic survey through which respondents can provide new information on their AD projects and an update to the existing AD facility inventory, if appropriate.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; RadNet (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "RadNet (Renewal)" (EPA ICR No. 0877.13, OMB Control No. 2060-0015) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through August 31, 2016. Public comments were previously requested via the **Federal Register** (81 FR 39042) on June 15, 2016 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before September 28, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2003-0041, to (1) EPA online using www.regulations.gov (our preferred method), by email to a-and-r-Docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460, and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information for which disclosure is restricted by statute.

Abstract: RadNet is a national network of stations collecting sampling media that include air, precipitation, and drinking water. Samples are sent to EPA's National Analytical Radiation Environmental Lab (NAREL) in Montgomery, Alabama, where they are analyzed for radioactivity. RadNet provides emergency response/homeland security and ambient monitoring information on levels of environmental radiation across the nation. All stations, usually operated by state and local personnel, participate in RadNet voluntarily. Station operators complete information forms that accompany the samples. The forms request information pertaining to sample type, sample location, start and stop date and times for sampling, length of sampling period, and volume represented. Data from RadNet are made available regularly on the Agency Web sites—Envirofacts and the EPA Web site www.epa.gov/radnet.

Form Numbers: 5900-23, 5900-24, 5900-27, 5900-29.

Respondents/affected entities: State and Local Officials.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 235 (total).

Frequency of response: Biweekly requested for air filters, each measurable event for precipitation, quarterly for drinking water.

Total estimated burden: 3,726 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$139,843 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 3,815 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to the transfer of the milk program to FDA and the elimination of the request to radiologically screen air-filters prior to shipment to NAREL.
