SUPPLEMENTARY INFORMATION: The existing formula rate provides sufficient revenue to recover annual expenses, interest, and capital requirements, within the cost recovery criteria set forth in DOE Order RA 6120.2; therefore, WAPA proposes to extend the current formula rate schedule for five years.

By way of background, Congress declared all Washoe Project costs non-reimbursable except the Stampede Powerplant. The average Stampede generation, approximately 10 gigawatt hours annually, is used principally to provide energy for two Federal fish hatcheries. Since the Washoe Project has a Federally-owned transmission lines, WAPA contracted with Truckee Donner Public Utility District and the City of Fallon (TDPUD/Fallon) to accept Stampede generation and serve project use loads. Energy in excess of project use loads is integrated with the Central Valley Project (CVP) and marketed under the 2004 Power Marketing Plan. Pursuant to Rate Schedule SNF–7, each year, any remaining reimbursable expenses, in excess of the revenue collected under the TDPUD/Fallon contract, are transferred to the CVP and incorporated into the CVP power revenue requirement.

In accordance with 10 CFR part 903.23(a)(2), WAPA determined it is not necessary to hold a public information or public comment forum, but is providing a 30-day comment period. Comments must be received by the end of the comment period. WAPA will post comments received to its Web site, https://www.wapa.gov/regions/SN/rates/Pages/rates.aspx. After considering public comments, WAPA will take further action on the proposed formula rate extension consistent with 10 CFR part 903.23(a).
