Before the proposed information collection provisions contained in this draft guidance become effective, we will publish a notice in the Federal Register announcing OMB’s decision to approve, modify, or disapprove the proposed information collection provisions. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it:

- Contains collection requirements approved by OMB.
- Identifies itself with OMB control number.
- Displays a currently valid OMB control number.

OMB will accept further comments on the Draft Guidance at either http://www.fda.gov/FoodGuidances or http://www.regulations.gov. An agency may not conduct or sponsor, a collection of information unless it displays a currently valid OMB control number.

### III. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either http://www.fda.gov/FoodGuidances or http://www.regulations.gov. The FDA Web site listed in the previous sentence will find the most current version of the guidance.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: Maternal, Infant, and Early Childhood Home Visiting Program Cost Reporting Pilot Study

OMB No. 0906–xxxx—NEW

Abstract: The Maternal, Infant, and Early Childhood Home Visiting Program (Federal Home Visiting Program), administered by HRSA in partnership with the Administration for Children and Families, supports voluntary, evidence-based home visiting services during pregnancy and to parents with young children up to kindergarten entry. States, Tribal entities, and certain nonprofit organizations are eligible to receive funding from the Federal Home Visiting Program and have the flexibility to tailor the program to serve the specific needs of their communities. Funding recipients may subaward grant funds to organizations, otherwise known as Local Implementing Agencies (LIAs), in order to provide services to eligible families in at-risk communities.

Need and Proposed Use of the Information: This information collection is requested to conduct a pilot study to test the reliability of a standardized cost reporting tool for the provision of evidence-based home visiting services. The information collected will be used to: Test the reliability and feasibility of implementing a proposed set of standardized cost metrics and organizational characteristics across various contexts; estimate preliminary total costs for implementing evidence-based home visiting services, including ranges, and; further refine cost metrics and the cost reporting tool based on feedback received through the pilot study. Proposed standard cost metrics have been developed based on a review of the existing literature for measures of home visiting costs, as well as from ongoing discussions with developers of evidence-based home visiting models.

HRSA received comments from one respondent during the public comment period which estimated the hourly burden per response to be 16 hours. The estimated burden has been revised to reflect this feedback. Further, the commenter expressed an interest in using the tool to analyze the cost-benefit and overall value of home visiting programs. While the cost reporting tool may be useful in collecting information that will lead to additional cost-benefit analyses, those analyses are outside the scope of the current project. A full response to the comments can be accessed in Part A of the Supporting Statement.

Likely Respondents: Organizations, including LIAs providing evidence-based home visiting services through the Federal Home Visiting Program.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.
