

to complete its contract of participation due to being absorbed into the HCV program of a PHA that did not administer an FSS program.

Nature of Requirement: This regulation states the FSS escrow shall be paid to the participant when the contract of participation has been completed and at the time of contract completion the head of the FSS family submits to the PHA a certification that to the best of his or her knowledge and belief, no member of the FSS family is a recipient of welfare assistance.

Granted By: Lourdes Castro Ramírez, Principal Deputy Assistant Secretary for Public and Indian Housing.

Date Granted: June 29, 2016.

Reason Waived: Although the FSS participant in question was unable to complete its contract of participation prior to being absorbed into the HCV program of the receiving PHA, the family was in compliance with the contract of participation and the move to the receiving PHA's jurisdiction was for good cause. In consideration of these circumstances, the waiver was granted so that escrow could be disbursed to the family without completing the contract of participation.

Receipt of an Application for an Incidental Take Permit for the American Burying Beetle, From American Electric Power, and Availability of Proposed Habitat Conservation Plan, Pittsburg County, Oklahoma

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for public comments.

Our low-effect screening form (LESF), which supports a categorical exclusion for the HCP under the National Environmental Policy Act (NEPA), is also available for review. The requested permit, which would be in effect for a period of 3 years, if granted, would authorize incidental take of the American burying beetle resulting from the construction of two segments of the Talawanda to McAlester electric transmission line.

SUPPLEMENTARY INFORMATION: Under the Act (16 U.S.C. 1531 *et seq.*), we have received an application for an ITP and a proposed HCP from AEP in Pittsburg County, Oklahoma. Our LESF, which supports a categorical exclusion for the HCP under NEPA (42 U.S.C. 4321, *et seq.*), is also available for review. The requested permit, which would be in effect for a period of 3 years, if granted, would authorize incidental take of the American burying beetle resulting from the construction of two segments of the Talawanda to McAlester electric transmission line.

Under NEPA, we advise the public that we have gathered the information necessary to determine impacts related to potential issuance of an ITP and have determined that the proposed action qualifies as a low-effect HCP and is categorically excluded from the NEPA process; and

In addition, the applicant has developed and proposes to implement

its draft HCP, as part of the application for an ITP, which describes the measures the applicant has agreed to take to avoid, minimize, and mitigate the effects of the incidental take of American burying beetles (*Nicrophorus americanus*; ABB; covered species) to the maximum extent practicable pursuant to section 10(a)(1)(B) of the Act.

The requested permit would authorize incidental take of the ABB as a result of the construction of two segments along 2.11 miles of the Talawanda to McAlester transmission line in Pittsburg County, OK (Permit Area), as a result of activities associated with the applicant's construction and maintenance activities (covered activities). Such actions may require disturbance within potential American burying beetle habitat. American Electric Power has proposed to mitigate the impacts to 13.07 acres of suitable habitat for the American burying beetle, including 10.42 acres of temporary impacts, 2.65 acres of permanent cover change (changing of vegetative successional stage, but remaining as suitable ABB habitat), and 0.006 acres of permanent change (changing of ABB habitat from suitable to non-suitable). These habitat acres will be mitigated in perpetuity according to Service-approved mitigation ratios through the purchase of credits at an approved conservation bank for ABB. Additionally, avoidance and minimization measures will be implemented including limiting clearing in temporary work areas, relief of soil compaction, and revegetation of temporary and permanent cover change impacts with native vegetation after construction is completed.

Section 9 of the Act and its implementing regulations prohibit "take" of fish and wildlife species listed as threatened or endangered under section 4 of the Act. However, section 10(a) of the Act authorizes us to issue permits to take listed wildlife species where such take is incidental to, and not the purpose of, otherwise lawful activities and where the applicant meets certain statutory requirements.

Authority

We provide this notice under section 10(c) of the Act (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.22) and NEPA (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1506.6).
