measures required by Rule 433 will result in a substantial reduction of PM_{10} emissions in the OVPA from the Owens Lake bed.\textsuperscript{3}

Guidance and policy documents that we use to evaluate enforceability, revision/relaxation and rule stringency requirements for the applicable criteria pollutants include the following:

4. “State Implementation Plans for Serious PM_{10} Nonattainment Areas, and Attainment Date Waivers for PM_{10} Nonattainment Areas Generally; Addendum to the General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990,” 59 FR 41998 (August 16, 1994).

B. Does the rule meet the evaluation criteria?

The PM_{10} emission controls and other requirements in Rule 433 are clear and adequately enforceable. The requirements clearly strengthen the SIP and are consistent with CAA sections 110(l) and 193. We intend to address BACM for this area in the near future when we act on the OVPA 2016 SIP. Therefore, we find that Rule 433 is consistent with the relevant policy and guidance regarding enforceability and does not result in a SIP relaxation. The TSD has more information on our evaluation.

C. Public Comment and Proposed Action

As authorized in section 110(k)(3) of the Act, the EPA proposes to fully approve the submitted rule because it fulfills all relevant requirements. We will accept comments from the public on this proposal until October 13, 2016. If we take final action to approve the submitted rule, our final action will incorporate this rule into the federally enforceable SIP.

III. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the GBUAPCD rule described in Table 1 of this preamble. The EPA has made, and will continue to make, these materials available through www.regulations.gov and at the EPA Region IX Office (please contact the person identified in the FOR FURTHER INFORMATION CONTACT section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA’s role is to approve State choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely proposes to approve State law as meeting federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this proposed action:

- is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- does not provide EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Particulate matter, Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401 et seq.

Dated: August 24, 2016.

Alexis Strauss,

Acting Regional Administrator, Region IX.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 680

RIN 0648–BG15

Fisheries of the Exclusive Economic Zone Off Alaska; Bering Sea and Aleutian Islands Crab Rationalization Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of fishery management plan amendment; request for comments.

SUMMARY: The North Pacific Fishery Management Council submitted Amendment 47 to the Fishery Management Plan for Bering Sea/Aleutian Islands King and Tanner Crabs (Crab FMP) to NMFS for review. If approved, Amendment 47 would exempt eastern Chionoecetes bairdi Tanner (EBT) and western C. bairdi
Tanner (WBT) crab that is custom processed at a facility through contractual arrangements with the processing facility owners from being applied against the individual processing quota (IPQ) use cap of the processing facility owners. Amendment 47 would modify the Crab FMP to allow all of the EBT and WBT Class A individual fishing quota crab to be processed at the facilities currently processing EBT and WBT crab and would have significant, positive economic effects on the fishermen, processors, and communities that participate in the EBT and WBT fisheries. This action is intended to promote the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act, the Crab FMP, and other applicable laws.

DATES: Submit comments on or before November 14, 2016.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2016–0081, by any one of the following methods.

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov or enter Docket ID: NOAA–NMFS–2016–0081 in the "Comment on Docket" box, complete the required fields, and enter or attach your comments.
- **Mail:** Submit written comments to Glenn Merrill, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS, Attn: Ellen Sebastian. Mail comments to P.O. Box 21668, Juneau, AK 99802–1668.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

Electronic copies of the Regulatory Impact Review/Initial Regulatory Flexibility Analysis (RIR/IRFA) (collectively referred to as the "Analysis") and the Categorical Exclusion prepared for Amendment 47 may be obtained from http://www.regulations.gov or from the NMFS Alaska Region Web site at http://alaskafisheries.noaa.gov.

FOR FURTHER INFORMATION CONTACT: Keeley Kent, 907–586–7228.

SUPPLEMENTARY INFORMATION: The Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) requires that each regional fishery management council submit any fishery management plan amendment it prepares to NMFS for review and approval, disapproval, or partial approval by the Secretary of Commerce. The Magnuson-Stevens Act also requires that NMFS, upon receiving a fishery management plan amendment, immediately publish a notice in the Federal Register announcing that the amendment is available for public review and comment. This notice announces that proposed Amendment 47 to the Crab FMP is available for public review and comment.

NMFS manages the king and Tanner crab fisheries in the U.S. exclusive economic zone of the Bering Sea and Aleutian Islands (BSAI) under the Crab FMP. The North Pacific Fishery Management Council (Council), with the assistance of the North Pacific Fishery Management Plan (MP) Task Force, initially issued processor quota (PQS) for the crab fisheries during a specific period. Under the Program, NMFS issued four types of PQS: Catcher vessel owner (CVO) PQS was assigned to holders of License Limitation Program (LLP) licenses who delivered their catch to shoreside crab processors or to stationary floating crab processors; catcher/processor vessel owner PQS was assigned to LLP license holders who harvested and processed their catch at sea; captains and crew on board catcher/processor vessels were issued catcher/processor crew PQS; and captains and crew on board catcher vessels were issued catcher vessel crew PQS. Each year, a person who holds PQS may receive an exclusive harvest privilege for a portion of the annual total allowable catch, called individual fishing quota (IFQ).

NMFS also issued processor quota share (PQS) under the Program. Each year PQS yields an exclusive privilege to process a portion of the IFQ in each of the nine BSAI crab fisheries. This annual exclusive processing privilege is called individual processor quota (IPQ). Only a portion of the QS issued yields IFQ that is required to be delivered to a processor with IPQ. QS derived from deliveries made by catcher vessel owners (i.e., CVO QS) is subject to designation as either Class A IFQ or Class B IFQ. Ninety percent of the IFQ derived from CVO QS is designated as Class A IFQ, and the remaining 10 percent is designated as Class B IFQ. Class A IFQ must be matched and delivered to a processor with IPQ. Class B IFQ is not required to be delivered to a specific processor with IPQ. Each year there is a one-to-one match of the total pounds of Class A IFQ with the total pounds of IPQ issued in each crab fishery.

When the Council recommended the Program, it expressed concern about the potential for excessive consolidation of QS and PQS, in which too few persons control all of the QS or PQS and the resulting annual IFQ and IPQ. The Council determined that excessive consolidation could have adverse effects on crab markets, price setting negotiations between harvesters and processors, employment opportunities for harvesting and processing crew, tax revenue to communities in which crab are landed, and other factors considered and described in the Program EIS. To address these concerns, the Program limits the amount of QS that a person can hold (i.e., own), the amount of IFQ that a person can use, and the amount of IPQ that can be used on board a vessel. Similarly, the Program limits the amount of PQS that a person can hold, the amount of IPQ that a person can use, and the amount of IPQ that can be processed at a given facility. These limits are commonly referred to as use caps.

In most of the nine BSAI crab fisheries under the Program, including the Tanner crab fisheries, a person is limited to holding no more than 30 percent of the PQS initially issued in the fishery, and to using no more than the amount of IPQ resulting from 30 percent of the initially issued PQS in a given fishery, with a limited exemption for persons receiving more than 30 percent of the initially issued PQS. No person in the EBT crab fisheries received in excess of 30 percent of the initially issued PQS (see Section 2.5.2 of
Trident Seafoods; and Unisea Seafoods. Information in section 2.6 of the Analysis explains that these three processors also own and operate all of the facilities that processed EBT and WBT IPQ crab during the 2015/2016 crab fishing year.

The Council recognized that consolidation within the Tanner crab processing sector has constrained the ability of the processing sector to process all of the EBT and WBT Class A IPQ crab without exceeding the IPQ use caps. The Council recognized that without additional unique and unaffiliated processing facilities entering the Tanner crab processing sector for the 2016/2017 crab fishing year or beyond, there is a significant risk that the portion of the Tanner crab allocation in excess of the caps would not be processed. Without the ability to have all EBT and WBT Class A IPQ processed, that portion of the Tanner crab allocation in excess of the caps would likely go unharvested because sufficient processing facilities do not exist in the Bering Sea region.

In June 2016, the Council recommended Amendment 47 to the FMP (74 FR 25449, May 28, 2009). Amendment 47 was designed to improve operational efficiencies in crab fisheries with historically low total allowable catches or that occur in more remote regions by exempting certain IPQ crab processed under a custom processing arrangement from applying against the IPQ use cap of the facility at which IPQ crab are processed.

Table 2–5 in Section 2.6.1 of the Analysis shows that during the 2006/2007 crab fishing year, there were six processing facilities owned by five unaffiliated processors receiving EBT Class A IPQ crab and there were five processing facilities owned by four unaffiliated processors receiving WBT Class A IPQ crab. Since then, there has been consolidation in the BSAI crab processing sector, thus reducing the number of processing facilities that are unaffiliated with one another. This consolidation has occurred through the merger of two companies and the recent exit of a company from the fishery.

Additionally, PQS has been purchased by entities that do not own or operate processing facilities. As Section 2.6 of the Analysis describes (see ADDRESSES), for the first time since the start of the Program, there were only three unique unaffiliated persons (processors) who received EBT and WBT IPQ crab at their facilities during the 2015/2016 crab fishing year. These three processors are the Maruha-Nichiro Corporation, which includes Alyeska Seafoods, Peter Pan Seafoods, and Westward Seafoods;
approval/disapproval decision on the amendment. To be considered, comments must be received, not just postmarked or otherwise transmitted, by the last day of the comment period.
