SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95-541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas a requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Application Details

1. *Applicant*—Permit Application: 2016-025
Dr. H. William Detrich, III, Dept. of

Marine and Environmental Sciences, Northeastern University Marine Science Center, 430 Nahant Rd., Nahant, MA 01908

Activity for Which Permit Is Requested

ASPAs entry; A permit is requested to enter ASPA 152 (Western Bransfield Strait) and ASPA 153 (Eastern Dallmann Bay) using the ARSV Laurence M. Gould to capture Antarctic fish by trawling and trapping. The collected fish would be used to study the effects of a warming Southern Ocean on development of the embryos of Antarctic fishes. Data collected under this permit would be part of a long-term (30-year) dataset. Approximately 50 hours of trawling would be conducted in ASPA 152 and approximately 20 hours would be conducted in ASPA 153. Sixteen traps would be set and allowed to soak for a total of 6 days. It is anticipated that approximately five hundred (500) individual fish representing four species (*Notothenia coriiceps*, *Chaenocephalus aceratus*, *Champscephalus gunnari*, *Gobionotothen gibberifrons*) would be captured in the ASPAs and used in the study. Live fishes would be transported to the aquarium facilities at Palmer Station for experimentation. Breeding and biochemical experiments would be conducted. All experimental animals would be humanely euthanized and properly disposed of outside the ASPAs.

Location

ASPAs 152 Western Bransfield Strait and ASPA 153 Eastern Dallmann Bay.

Dates

April 17, 2016 to September 1, 2018.
