statutory authority responsibility to protect the park areas it administers and to manage the public use thereof (54 U.S.C. 100101, 100751, 3210102). NPS regulations codified in 36 CFR parts 1 through 7, 12 and 13 are designated to implement statutory mandates that provide for resource protection and pubic enjoyment. NPS Forms 10-404, 'Backcountry/Wilderness Use Permit Application' and 10–404A, "Backcountry/Wilderness Use Permit Hangtag" are the primary forms used to provide access into NPS backcountry areas including those areas that require a reservation to enter where use limits are imposed in accordance with other NPS regulations. Such permitting enhances the ability to the NPS to educate users on potential hazards, search and rescue efforts, and resource protection.

II. Data

OMB Control Number: 1024–0022. Expiration Date: May 31, 2016. Title: Backcountry/Wilderness Use Permit (36 CFR 1.5, 1.6, and 2.10).

Service Form Numbers: NPS Forms 10–404, Backcountry/Wilderness Use Permit' and 10–404A, "Backcountry/Wilderness Use Permit Hangtag".

Type of Request: Revision of a currently approved collection of information.

Description of Respondents: Individuals wishing to use backcountry and wilderness areas within national parks.

Estimated Average Number of Responses: 285,000.

Frequency of Response: 1 per respondent.

Ēstimated Average Time Burden per Respondent: 5 minutes.

Estimated Total Annual Reporting Burden: 23,750 hours.

Respondent's Obligation: Required to obtain or retain a benefit.

III. Comments

We invite comments concerning this information collection on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information:
- Ways to enhance the quality, utility, and clarity of the information to be collected: and
- Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. We will include or

summarize each comment in our request to OMB to approve this IC. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: September 8, 2016.

Madonna L. Baucum,

Information Collection Clearance Officer, National Park Service.

BILLING CODE 4310-EH-P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[RR03250000; XXXR4079V1; RA.R3441003.0960000]

Notice of Cancellation To Prepare a Draft Environmental Impact Statement for the San Carlos Irrigation Project, Arizona

AGENCY: Bureau of Reclamation,

Interior.

ACTION: Notice.

SUMMARY: The Bureau of Reclamation (Reclamation) is terminating preparation of an Environmental Impact Statement (EIS) for the San Carlos Irrigation Project. The proposed project scope has been modified, and Reclamation has determined that an Environmental Assessment (EA) rather than an EIS is the appropriate level of environmental documentation for the proposed action.

FOR FURTHER INFORMATION CONTACT: Mr. Sean Heath at (623) 773–6250, or email at *sheath@usbr.gov*.

SUPPLEMENTARY INFORMATION: The proposed project includes rehabilitation and modernization of San Carlos Irrigation Project Joint Works and District Works irrigation canals. Primary components of the rehabilitation are the lining of all or most of the main canals with concrete to reduce seepage and evaporation losses from the system, the modification of the canal prism (crosssections and profiles) to increase system efficiency, the inclusion of a water storage facility, and modernized measurement and control amenities to improve delivery service. To protect and preserve the new lined conveyance system, separate storm water drainage

facilities would be dedicated to cross drainage storm water management.

A Notice of Intent to prepare the EIS for the San Carlos Irrigation Project was published in the Federal Register on August 31, 2010 (75 FR 53332). The proposed action was originally scoped as an EIS. Publication of the Federal **Register** notice was followed with a scoping letter to potentially interested individuals, organizations, tribes, and agencies, and posting of the notice on Reclamation's Phoenix Area Office Web site. In addition, a news release was submitted to 12 news media outlets. Two public scoping meetings were held to solicit public comment. Reclamation received nine comment letters regarding the proposed action, none of which identified potentially significant effects to the human environment.

The Notice of Intent described a proposal to rehabilitate and line up to 40 miles of major canals, such as the Florence-Casa Grande, Casa Grande, and North Side canals, along with construction of new check structures and cross-drainage features. During preparation of the EIS, a new alternative was subsequently developed that would reduce potential environmental impacts of the project. The new alternative would accommodate the delivery of irrigation flows during construction, thereby reducing potential adverse impacts to sensitive riparian habitat and bird species on the Gila River. Furthermore, the geographic scope of the rehabilitation was reduced from 40 miles to 25 miles. Reclamation has not identified other environmental effects of the proposed action that are potentially significant and would warrant us to consider preparation of an EIS over an EA. Based on the reduction in scope, and the limited response to solicitation of comments, Reclamation has determined that an EA is the appropriate level of environmental analysis for the proposed action.

Dated: September 8, 2016.

Marc Maynard,

Acting Regional Director, Lower Colorado Region.
