DEPARTMENT OF THE TREASURY
Office of the Comptroller of the Currency

Agency Information Collection Activities: Revision of an Approved Information Collection; Submission for OMB Review; Company-Run Annual Stress Test Reporting Template and Documentation for Covered Institutions With Total Consolidated Assets of $50 Billion or More Under the Dodd-Frank Wall Street Reform and Consumer Protection Act

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other federal agencies to comment on a revision to this information collection, as required by the Paperwork Reduction Act of 1995. An agency may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid control number.

10. For ongoing verification and demonstration of the integrity of the underground storage reservoir or cavern, operators should use appropriate monitoring techniques such as the monitoring of pressure and periodic pressure surveys, inventory (injection & withdrawal of all products), product levels, cavern subsidence, and the findings from adjacent production and water wells, and observation wells used to monitor underground storage including any integrity changes.

11. Emergency procedures should identify the types of emergencies for which the operator should notify public emergency response officials, personnel training, periodic communication with local emergency response officials, identification of the local area impacted, notices to the public, and identification of any third-party service providers or technical experts needed in the event of an emergency. Emergency procedures should be reviewed, conducted, and updated at least annually.

12. Records of the processes, procedures, assessments, reassessments, and mitigation measures required should be maintained for the life of the storage well.

Issued in Washington, DC, on February 2, 2016, under authority delegated in 49 CFR 1.97.

Alan K. Mayberry,

Deputy Associate Administrator for Policy and Programs.

BILLING CODE 4910–60–P

---

required to submit to the Board of Governors of the Federal Reserve System (Board) and to its primary financial regulatory agency a report at such time, in such form, and containing such information as the primary financial regulatory agency may require. On October 9, 2012, the OCC published in the Federal Register a final rule implementing the section 165(i)(2) annual stress test requirement. This rule describes the reports and information collections required to meet the reporting requirements under section 165(i)(2). These information collections will be given confidential treatment (5 U.S.C. 552(b)(4)).

In 2012, the OCC first implemented the reporting templates referenced in the final rule. See 77 FR 49485 (August 16, 2012) and 77 FR 66663 (November 6, 2012). The OCC proposed revisions to these templates on November 17, 2015. No comments were received on those proposed revisions, and the OCC is now finalizing those revisions, as described below.

The OCC intends to use the data collected to assess the reasonableness of the stress test results of covered institutions and to provide forward-looking information to the OCC regarding a covered institution’s capital adequacy. The OCC also may use the results of the stress tests to determine whether additional analytical techniques and exercises could be appropriate to identify, measure, and monitor risks at the covered institution. The stress test results are expected to support ongoing improvement in a covered institution’s stress testing practices with respect to its internal assessments of capital adequacy and overall capital planning.

The OCC recognizes that many covered institutions with total consolidated assets of $50 billion or more are required to submit reports using Comprehensive Capital Analysis and Review (CCAR) reporting form FR Y-14A. The OCC also recognizes the Board has recently modified the FR Y-14A, and, to the extent practical, the OCC has kept its reporting requirements consistent with the Board’s FR Y-14A in order to minimize burden on covered institutions. The OCC has also revised the Scenario Schedule, which collects information on scenario variables beyond those provided by the OCC. The purpose of this revision is to require

**Revisions To Reporting Templates for Institutions With $50 Billion or More in Assets**

The revisions to the DFAST–14A reporting templates consist of the following:

- Bank-specific scenario: Covered institutions would be required to submit bank-specific baseline and stress scenarios and projections for 2017 and will have the option to do so for 2016;
- Largest counterparty default: For the largest trading covered institutions that also submit the Global Market Shock scenario, they would be required to assume the default of their largest counterparty in the supervisory severely adverse and adverse scenarios for 2017 and will have the option to do so for 2016;
- Advanced approaches banks: (1) Delay incorporation of the supplemental leverage ratio for one year and (2) indefinitely defer the use of the advance approaches for stress testing projections;
- Reporting Template and Supporting Documentation Changes: Clarifying instructions, adding data items, deleting data items, and redifining existing data items. This includes an expansion of the information collected in the scenario schedule. The proposed revisions also include a shift of the as-of date in accordance with modifications to the OCC’s stress testing rule.

- These revisions also reflect the implementation of the final Basel III capital rules. The revisions delay until further clarity on the definitions of the additional scenario variables.

**Largest Counterparty Default**

Covered institutions that currently complete the Global Market Shock will also be required to complete the Largest Counterparty Default component for the 2017 submission and have the option to do so for the 2016 submission. This is currently required by the Board, and the OCC is adopting a similar requirement to enhance consistency.

**Supplemental Leverage Ratio**

The supplementary leverage ratio requirement applies only to covered institutions that use the advanced approaches to calculate their minimum regulatory capital requirements. For these covered institutions, the revisions delay the incorporation of the supplementary leverage ratio in stress testing projections for one year. Under the revisions, these covered institutions are not required to include an estimate of the supplementary leverage ratio for the stress test cycle beginning on January 1, 2016. The Board has adopted a similar delay.

**Advanced Approaches**

Covered institutions have noted that the use of advanced approaches in stress test rules would require significant resources and would introduce complexity and opacity. In light of the concerns raised by these covered institutions, and pending a review of how the stress test rules interact with the regulatory capital rules as described above, the revisions delay until further notice the use of the advanced approaches for calculating risk-based capital requirements for purposes of the capital plan and stress test rule.

**Other Reporting Template and Instruction Changes**

The revisions to the DFAST–14A consist of clarifying instructions, adding and removing schedule items, adding, deleting, and modifying existing data items, and altering the as-of dates. These
changes (1) increase consistency between the DFAST–14A with the FR Y–14A, Call Report, FFIEC 101, and FFIEC 102; (2) remove the requirement to calculate tier 1 common capital and the tier 1 common ratio; (3) shift the as-of dates by one quarter in accordance with the modifications to the stress test rules; (4) modify and expand the supporting documentation requirements; and (5) increase the historical information collected in the scenario schedule in order to facilitate comparisons of the data. Furthermore, the Board is currently collecting information for the Summary Schedule via XML scheme technology, and the OCC will use a similar format to enhance consistency and reduce regulatory burden. Technical details on these forms can be found under technical instructions at http://www.occ.gov/tools-forms/forms/bank-operations/stress-test-reporting.html.

Schedule A (Summary, General RWA)—Deletion

This schedule has been removed in accordance with the elimination of the use of the tier 1 common ratio, effective for the 2016 DFAST submission. However, in order to mitigate operational issues and allow for appropriate time to adjust internal systems to accommodate changes this schedule remains part of the technical XML instructions for the 2016 DFAST submission.

Schedule A (Summary, Standardized RWA)—Revisions

This schedule has been modified to increase consistency with the FFIEC 102. Specifically, the items of the existing market risk-weighted asset portion have been replaced with the appropriate items from the FFIEC 102. There are also a number of other technical changes; some will be required for the 2016 DFAST submission and others will be required for the 2017 submission. See the final instructions for specific details.

Schedule A (Summary, Capital)—Revisions

The OCC has modified this schedule to increase consistency between the FFIEC 102 and the DFAST 2016 submission. As such, the revisions require that covered institutions provide three more historical quarters in addition to the currently required most recent historical quarter of actual data values for each additional variable submitted. The revisions also provide additional instructions on variable naming conventions and other appropriate standardizations in order to facilitate more streamlined electronic processing of the data. In addition to the proposed schedule, the OCC is adding three new items to the final schedule in order to provide further standardized classification system for each variable submitted.

Regulatory Capital Transitions Schedule—Revisions

The OCC has modified this schedule by removing projected year six from the projection period.

Regulatory Capital Instruments Schedule—Revisions

The OCC has modified this schedule by removing line items corresponding to the general risk-based capital rules.

Estimated Number of Respondents: 22.

Estimated Total Annual Burden: 12,254 hours.

The OCC believes that the systems covered institutions use to prepare the FR Y–14 reporting templates to submit to the Board will also be used to prepare the reporting templates described in this notice. Comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Comments continue to be invited on:
 (a) Whether the collection of information is necessary for the proper performance of the OCC, including whether the information has practical utility;
 (b) The accuracy of the OCC’s estimate of the burden of the collection of information;
 (c) Ways to enhance the quality, utility, and clarity of the information to be collected;
 (d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and
 (e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: February 1, 2016.

Stuart Feldstein,
Director, Legislative and Regulatory Activities Division.
