

OMB Approval Number: 3145–0020.
Expiration Date of Approval: August 31, 2018.

Type of Request: Intent to seek approval to extend an information collection for three years.

Abstract: The Survey of Doctorate Recipients (SDR) has been conducted biennially since 1973 and is a longitudinal survey. The 2017 SDR will consist of a sample of individuals less than 76 years of age who have earned a research doctoral degree in a science, engineering or health (SEH) field from a U.S. institution. The purpose of this panel survey is to collect data that will be used to provide national estimates on the doctoral science and engineering workforce and changes in their employment, education and demographic characteristics. The SDR is sponsored by the National Center for Science and Engineering Statistics (NCSES) within the NSF and the National Institutes of Health. Data will be obtained by web survey, mail questionnaire, and computer-assisted telephone interviews beginning in February 2017. Information from the SDR are used in assessing the quality and supply of the nation's SEH personnel resources for educational institutions, private industry, and professional organizations, as well as federal, state, and local governments. A public release file of the collected data, designed to protect respondent confidentiality, will be made available to researchers, reporters, and other interested persons on the Internet.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to “. . . provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government.” The SDR is designed to comply with these mandates by providing information on the supply and utilization of the nation's doctoral level scientists and engineers.

The survey data will be collected in conformance with the Confidential Information Protection and Statistical Efficiency Act of 2002 and the individual's response to the survey is voluntary. NSF will ensure that all information collected will be kept strictly confidential and will be used only for statistical purposes.

Use of the Information: The NSF uses the information from the SDR to prepare congressionally mandated reports such as *Women, Minorities and Persons with Disabilities in Science and Engineering* and *Science and Engineering Indicators*.

These two reports are made available, in full, on the internet. However, summary *Digests* of facts and figures from these lengthy reports are made available both in print and online. Although NSF publishes statistics from the SDR in many reports, a full report with over 80 tables is produced online in the biennial series, *Characteristics of Scientists and Engineers with U.S. Doctorates*.

Expected Respondents. The NCSES within NSF enhanced and expanded the sample for the prior 2015 cycle of the SDR to measure employment outcomes according to the eligible SEH fine fields of degree captured in the Survey of Earned Doctorates. Providing reliable estimates by fine fields required expanding the 2013 SDR sample from approximately 47,000 to 120,000 in 2015. Another effect of expanding the 2015 SDR sample is the enhanced production of reliable estimates of SEH fine fields by various demographic characteristics, such as gender, ethnicity, and race. The 2017 SDR will maintain the 2015 expanded sample along with a new sample of about 10,000 doctorates from the most recent 2014 and 2015 academic years and will not exceed 123,000 individuals in total with U.S. earned doctorates in SEH fields. NSF expects the overall 2017 SDR response rate to be approximately 75 percent.

Estimate of Burden. The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it takes approximately 25 minutes. Thus, NSF estimates that the total annual burden for the 2017 SDR will be 38,438 hours (that is, 123,000 respondents at 75% response rate for 25 minutes).

SUPPLEMENTARY INFORMATION:

I. Background

By letter dated May 4, 1995, the NRC received a license amendment request from Cimarron Corporation (the licensee at that time) to amend its license SNM-928 to incorporate its decommissioning plan. The NRC requested comment on the decommissioning plan (60 FR 46315; September 6, 1995). The NRC completed its review of the decommissioning plan, and issued a finding of no significant impact in the **Federal Register**, (64 FR 44059; August 12, 1999). This decommissioning plan relied on natural attenuation to reduce uranium concentrations in groundwater at the site to meet the criteria for unrestricted release. However, periodic

monitoring of groundwater conditions indicated that natural attenuation was not reducing the uranium concentrations and additional areas were identified where uranium concentrations exceeded the criteria for unrestricted release.

The current licensee, EPM, submitted a license amendment request to the NRC on December 31, 2015 (ADAMS Package Accession No. ML16230A614), which, if approved, would amend Source and Byproduct Materials License SNM-928 to authorize decommissioning of the Cimarron Facility near Crescent, Oklahoma for unrestricted release. On April 7, 2016, the NRC requested additional information from EPM regarding the license amendment request (ADAMS Accession No. ML16091A427). By letter dated May 20, 2015 (ADAMS Accession No. ML16168A097), EPM submitted supplemental information in response to the NRC's request.

On September 6, 2016, the NRC found the application acceptable for a technical review (ADAMS Accession No. ML16197A056). Prior to reaching a decision on the amendment request, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended (the Act) and the NRC's regulations. The NRC's findings will be documented in a safety evaluation report and an environmental assessment. The environmental assessment will be the subject of a subsequent notice in the **Federal Register**.

II. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any persons (petitioner) whose interest may be affected by this action may file a request for a hearing and a petition to intervene (petition) with respect to issuance of the amendment to the subject facility operating license or combined license. Petitions shall be filed in accordance with the Commission's "Agency Rules of Practice and Procedure" in 10 CFR part 2. Interested persons should
