

not otherwise accounted for by those agencies. In order to account for all the burden hours associated with the NEISS information collection, we have added those hours to the collection of information. The increase in burden hours also includes the increase associated with offering internet-based questionnaires in addition to in-person and telephone interviews.

This information collection request excludes the burden associated with other publicly available Consumer Product Safety Information Databases, such as internet complaints, Hotline, and Medical Examiners and Coroners Alert Project (MECAP) reports, which are approved under OMB control number 3041-0146. This information collection request also excludes the burden associated with follow-up investigations conducted by other federal agencies.

The annual cost to the government of the collection of the NEISS information is estimated to be about \$4.9 million a year. This estimate includes \$3.3 million in compensation to NEISS respondents described in section 12(a) above. This estimate also includes \$1.603 million for about 150 CPSC professional staff months each year. The estimate of professional staff months includes the time required to: Oversee NEISS operations (*e.g.*, administration, training, quality control); prepare questionnaires, interviewer guidelines, and other instruments and instructions used to collect the information; conduct face-to-face and telephone interviews; and evaluate responses obtained from interviews and completed forms. Each month of professional staff time costs the Commission about \$10,683.83. This is based on a GS-12 mid-level salaried employee. The average yearly wage rate for a mid-level salaried GS-12 employee in the Washington, DC metropolitan area (effective as of January 2016) is

\$87,821 (GS-12, step 5). This represents 68.5 percent of total compensation (U.S. Bureau of Labor Statistics, "Employer Costs for Employee Compensation," March 2016, Table 1, percentage of wages and salaries for all civilian management, professional, and related employees: <http://www.bls.gov/ncs/>). Adding an additional 31.5 percent for benefits brings average yearly compensation for a mid-level salaried GS-12 employee to \$128,206.

Secretary, Consumer Product Safety Commission.

POLICY JUSTIFICATION

Afghanistan—Individual and Crew Served Weapons

The Government of Afghanistan has requested a possible sale of:

Major Defense Equipment (MDE): Four thousand, eight hundred and ninety-one (4,891) M16A4 5.56mm Rifles, Four hundred and eighty-five (485) M240B 7.62mm Machine Guns, Eight hundred (800) M2 .50 caliber Machine Guns.

Non-MDE:

Also included with this request are M249 Light Automatic Machine Guns; M110 7.62mm Sniper Rifles; MK-19 40mm Grenade Launchers; MK-93 40mm Machine Gun Mounts; M3 Tripod

Machine Gun Mounts; Spare Barrels; spare and repair parts; lot validation; publications and technical documentation; personnel training and training equipment; Quality Assurance Team; U.S. Government and contractor technical and logistics support services; and other related elements of logistics and program support. The estimated cost is \$60 million.

The proposed sale will enhance the foreign policy and national security objectives of the United States by helping to improve the security of a strategic partner by providing weapons needed to maintain security and stability, as well as to conduct offensive operations against an ongoing insurgency. A stable and secure Afghanistan is vital to regional stability. This proposed sale will also demonstrate the U.S. commitment to Afghanistan's security.

Afghanistan has an urgent requirement to increase its stocks of crew-served weapons for ongoing counter-insurgency operations and enduring threats to its national sovereignty. These articles were determined to be necessary and are based on Afghanistan's force structure and operational requirements.

The Afghan National Army (ANA) will use these weapons and equipment in both offensive and defensive operations against insurgents and terrorists within their borders. Without these defense articles, the ANA will not have the military capabilities that are necessary to maintain security and stability. The ANA is thoroughly trained and prepared to use the proposed defense articles. Afghanistan will have no difficulty absorbing this equipment into its armed forces.

While equipment for the ANA is typically purchased with Title 10 Afghanistan Security Forces Fund (ASFF) appropriations and implemented by DSCA through pseudo-FMS cases, Afghanistan will use U.S. government grants to fund and support this proposed purchase.

The principal contractor for the M240B will be FN America, Colombia,

SC. The principal contractors for the M16A4, M2, and other weapons have not been identified pending open competition and contract award. Some items may be drawn from Army stocks to meet desired delivery dates. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this sale will require the assignment of approximately eight (8) additional U.S. Government and approximately six (6) contractor representatives to Afghanistan for approximately 5–6 weeks in support of the fielding, maintenance and personnel training.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
