

*Need and Use of Information Collection:* The NIDA Summer Research Internship program introduces high school and undergraduate students of underrepresented populations to substance abuse research through internships with NIDA grantees at universities across the United States and Puerto Rico. Students intern with NIDA principal investigators for 8–10 weeks during the summer. The internship experience may include laboratory experiments, formal courses, data

collection, data analysis, patient recruitment, manuscript preparation, literature reviews and library research. This outreach and pipeline program exposes students interested in biomedical and behavioral research careers to cutting edge substance abuse research.

This program fills a significant unmet need to encourage and support individuals from underrepresented groups to pursue careers in substance abuse research. The NIDA Summer Research Internship program offers a

unique opportunity to increase the diversity and creativity of the biomedical research workforce by fostering the development of young talent through the creation of mentorship and training opportunities with premier substance abuse research laboratories around the country.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 350.
