*Prescribed Grazing (Code 528)*: The prescribed grazing standard was reviewed and updated to reflect current agency policy and science. Changes were made to clarify and recognize the benefits of prescribed grazing on soil health. Clarified “practice description” by adding “. . . with the intent to achieve specific ecological, economic, and management objectives.” In “purpose,” the concept of plant community “structure” was added when addressing plant communities, and added verbiage identifying the benefits of this practice to soil health.

*Restoration of Rare or Declining Natural Communities (Code 643)*: Changed title from Restoration and Management of Rare and Declining Habitats to Restoration of Rare or Declining Natural Communities. The term “habitats” is changed to “natural communities” to encompass not only wildlife resource concerns, but also activities targeting a unique plant community. Unique to restoration efforts of rare and declining natural communities, the restoration of the abiotic conditions is typically necessary, prior to restoration of biotic conditions. Broadened the scope to include abiotic restoration and restoration of plant communities.
