

conduct online surveys of grantee Project Directors. This is a new project request targeting the collection of primary, organizational-level data through an online survey with grantee Project Directors. The grantee programs that will be involved are focused on integrating HIV and Hepatitis primary care, substance abuse, and behavioral health services and include: (1) TI-12-007 Targeted Capacity Expansion HIV Program: Substance Abuse Treatment for Racial/Ethnic Minority Populations at High-Risk for HIV/AIDS (TCE-HIV) grantees; (2) TI-14-013 Minority AIDS Initiative—Continuum of Care (MAI-CoC) grantees; (3) TI-13-011 Targeted Capacity Expansion HIV Program: Substance Abuse Treatment for Racial/Ethnic Minority Women at High Risk for HIV/AIDS (TCE-HIV: Minority Women) grantees; and (4) TI-15-006 Targeted Capacity Expansion: Substance Use Disorder Treatment for Racial/Ethnic Minority Populations at High-Risk for HIV/AIDS (TCE-HIV: High Risk Populations) grantees.

The goals of the grantee programs are to integrate behavioral health treatment, prevention, and HIV medical care services for racial/ethnic minority

populations at high risk for behavioral health disorders and at high risk for or living with HIV. The grantee programs serve many different populations including African American, Hispanic/Latina and other racial/ethnic minorities, young men who have sex with men (YMSM), men who have sex with men (MSM) and bisexual men, adult heterosexual women and men, transgender persons, and people with substance use disorder. Project Director Surveys conducted with grantees are an integral part of evaluation efforts to: (1) Assess the impact of the SAMHSA-funded HIV programs in: Reducing behavioral health disorders and HIV infections; increasing access to substance use disorder (SUD) and mental disorder treatment and care; improving behavioral and mental health outcomes; and reducing HIV-related disparities in four specific grant programs; (2) Describe the different integrated behavioral health and medical program models; and (3) Determine which program types or models are most effective in improving behavioral health and clinical outcomes. SAMHSA will request one web-based survey to be completed by each of the

152 grantee Project Directors. Project Directors may request assistance from another project administrator to help them complete the survey. The web-based survey will be conducted once for grantees in each grant program, in the grantee organization's final year of TCE-HIV (TI-12-007, TI-13-011, TI-15-006) or MAI CoC (TI-14-013) funding, with an annual average of 50 grantees/100 respondents per year. Project Directors will provide information on their program's integration of HIV and Hepatitis medical and primary care into behavioral health services and project implementation. While participating in the evaluation is a condition of the grantees' funding, participating in the survey process is voluntary. The questionnaire is designed to collect information about: Grantee organizational structure, outreach and engagement, services provided through the grant-funded project, coordination of care, behavioral health/medical care integration, funding and project sustainability, staffing and staff development.

The table below is the annualized burden hours:

ESTIMATE OF ANNUAL AVERAGE REPORTING BURDEN: PROJECT DIRECTOR SURVEY

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the

Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer at (240) 276-1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: SAMHSA Transformation Accountability (TRAC) Data Collection Instrument (OMB No. 093-0285)—Revised

The Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Mental Health Services (CMHS) is proposing to modify one of its current Transformation Accountability (TRAC) system data collection tools to include previously piloted recovery measures. Specifically, this revision entails the incorporation of twelve recovery measures into the current CMHS NOMs Adult Client-level Measures for Discretionary Programs Providing Direct Services data collection tool. As part of its strategic initiative to support recovery from mental health and substance use disorders, SAMHSA has been working to develop a standard measure of recovery that can be used as part of its grantee performance reporting activities.

This revision will add eight questions from the World Health Organization's (WHO) Quality of Life (QOL) to SAMHSA's existing set of Government

Performance and Results Act (GPRA) measures along with four additional measures that support the WHO QOL–8. Data will be collected at two time points—at client intake and at six

months post-intake. These are two points in time during which SAMHSA grantees routinely collect data on the individuals participating in their programs.

The WHO QOL–8 will assess the following domains using the items listed below:

Question number	Item	Domain
1	How would you rate your quality of life?	Overall quality of life.
2	How satisfied are you with your health?	Overall quality of life.
3	Do you have enough energy for everyday life?	Physical health.
4	How satisfied are you with your ability to perform your daily living activities?	Physical health.
5	How satisfied are you with yourself?	Psychological.
6	How satisfied are you with your personal relationships?	Social relationships.
7	Have you enough money to meet your needs?	Environment.
8	How satisfied are you with the conditions of your living place?	Environment.

The revision also includes the following recovery-related performance measures:

Question number	Item
9	During the past 30 days, how much have you been bothered by these psychological or emotional problems? (This question will be placed in the instrument following the K6 questions for proper sequence).
10	I have family or friends that are supportive of my recovery.
11	I generally accomplish what I set out to do.
12	I feel capable of managing my health care needs.

Approval of these items by the Office of Management and Budget (OMB) will allow SAMHSA to further refine the Recovery Measure developed for this project. It will also help determine

whether the Recovery Measure is added to SAMHSA’s set of required performance measurement tools designed to aid in tracking recovery

among clients receiving services from the Agency’s funded programs.

Table 1 below indicates the annualized respondent burden estimate.
