DEPARTMENT OF TRANSPORTATION**National Highway Traffic Safety Administration****[Docket No. NHTSA–2016–0089]****Model Minimum Uniform Crash Criteria**

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice and request for comments .

SUMMARY: The National Highway Traffic Safety Administration (NHTSA), in coordination with the Governors Highway Safety Association (GHSA), the Federal Highway Administration (FHWA), and the Federal Motor Carrier Safety Administration (FMCSA), is in the process of reviewing the Guidelines for the Model Minimum Uniform Crash Criteria (MMUCC) Fourth Edition, December 2012, and requests comments to determine appropriate improvements to address stakeholder concerns. The MMUCC provides States with a dataset for describing crashes of motor vehicles in transport that generates the information necessary to improve highway safety within each State and

nationally. NHTSA and GHSA established an expert panel to review the proposed changes and comments received from **Federal Register** Notice FR Doc. 2016–09231. On July 27–28, 2016, the MMUCC expert panel met and decided on initial changes to MMUCC based on input from the subject matter experts in attendance and written comments submitted in response to a April 21, 2016 request for comments. The MMUCC panel will meet again on October 27–28, 2016, to continue deliberating changes to MMUCC and is seeking public input on additional changes. Crash data users may comment on the utility of the current MMUCC guidelines, the draft changes to MMUCC, and suggest additional changes for the next update to MMUCC. Based on the input received in response to this notice, NHTSA and GHSA anticipate issuing changes to the Guidelines in 2017.

SUPPLEMENTARY INFORMATION: The Model Minimum Uniform Crash Criteria (MMUCC) provides data elements for describing crashes of motor vehicles in transport that generates the information necessary to improve highway safety within each State and nationally. Statewide motor vehicle traffic crash data systems provide the basic information necessary for effective highway and traffic safety efforts at any level of government—local, State, or Federal. State crash data are used to perform problem identification, establish goals and performance measures, allocate resources, determine the progress of specific programs, and support the development and evaluation

of highway and vehicle safety countermeasures. The use of State crash data can be hindered by the lack of uniformity between and within States.

MMUCC represents a voluntary and collaborative effort to generate uniform crash data that are accurate, reliable, and credible for data-driven highway safety decisions within a State, between States, and at the national level. MMUCC was originally developed in response to requests by States interested in improving and standardizing their State crash data. Lack of uniform reporting made the sharing and comparison of State crash data difficult. Different elements and definitions resulted in incomplete data and misleading results. MMUCC recommends voluntary implementation of a “minimum set” of standardized data elements to promote comparability of data within the highway safety community. It serves as a foundation for State crash data systems. The next planned update of the MMUCC Guideline is scheduled for 2017.

Implementation of MMUCC is an ongoing and collaborative effort. Changes to MMUCC approved during the first panel meeting on July 27-28, 2016, included creating new subsections for crashes involving (a) fatalities, (b) large vehicles/hazardous materials, and (c) non motorists; and modifications to existing crash, vehicle and person data elements. This second request for information will provide additional input to the MMUCC expert panel on a number of stakeholders' proposals including the addition of a new data element for “Motor Vehicle Automation Equipped and Use.” These topics will be discussed during the second meeting on October 27-28, 2016, after which, NHTSA, in collaboration with GHSA, FHWA, and FMCSA, will review and finalize the MMUCC 5th edition for publication in 2017. Additional information about the MMUCC update can be found on the Governor's Highway Safety Association Web site www.ghsa.org. Full text of the draft revised version of MMUCC can be viewed in the docket. The MMUCC 4th edition can be viewed on the National Highway Traffic Safety Administration's Web site at <http://www-nrd.nhtsa.dot.gov/Pubs/811631.pdf>.
