

Category 7: Impacts of Wide-Scale Electrification

We are also interested in the potential material implications of wide-scale electrification (industry, transportation, etc.).

- What components are needed and for what purpose to accomplish wide-scale electrification (both in the electricity infrastructure and end use applications) and what quantities will be required in what timeframe?

- What materials of interest are required for these components?

Category 8: Additional Information

- Are there other materials that DOE should analyze (beyond the materials of interest) that may be of concern due to increasing demand for energy technologies and/or supply risk? Please explain and provide material content by component and energy technology.

- Are there other technologies or components that DOE should analyze (beyond the technologies of interest)? Please explain.

- Is there additional information, not requested above, that you believe DOE should consider in updating the Critical Materials Strategy? If so, please provide here.

II. Confidential Business Information

Pursuant to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email two well marked copies: one copy of the document marked “confidential” including all the information believed to be confidential, and one copy of the document marked “non-confidential” with the information believed to be confidential deleted. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

Factors of interest to DOE when evaluating requests to treat submitted information as confidential include: (1) A description of the items; (2) whether and why such items are customarily treated as confidential within the industry; (3) whether the information is generally known by or available from other sources; (4) whether the information has previously been made available to others without obligation concerning its confidentiality; (5) an explanation of the competitive injury to the submitting person that would result from public disclosure; (6) when such information might lose its confidential character due to the passage of time; and

(7) why disclosure of the information would be contrary to the public interest.
