Food and Nutrition Service

Title: Identifying Program Components and Practices that Influence SNAP Application Processing Timeliness Rates.

OMB Control Number: 0584–NEW.

Summary of Collection: The Food and Nutrition Act of 2008, as amended (the Act), Sections 11(e)(3) and 11(e)(9) requires that initial SNAP applications be processed and benefits provided within 30 days of the application date, or within 7 days for expedited applications.

Results of these monitoring activities have indicated that a majority of States do not meet the acceptable performance criterion of a 95 percent application processing timeliness (APT) rate. Animal and Plant Health Inspection Service

Title: Importation of Mangoes from India

OMB Control Number: 0579–0312

Summary of Collection: Under the Plant Protection Act (7 U.S.C. 7701 *et seq.*), the Secretary of Agriculture is authorized to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests new to the United States or not known to be widely distributed throughout the United States. The Animal and Plant Health Inspection Service (APHIS) regulates the importation of fruits and vegetables into the continental United States from certain parts of the world as provided in “subpart-Fruit and Vegetables” (7 CFR

319.56–1 through 319.56–75). In accordance with these regulations, mangoes from India may be imported into the United States only under certain conditions to prevent the introduction of plant pests into the United States.

Need and Use of the Information: APHIS amended the fruits and vegetables regulations to allow the importation into the continental United States of mangoes from India under certain conditions. As a condition of entry, the mangoes have to undergo irradiation treatment and be accompanied by a phytosanitary certificate with additional declaration statement providing specific information regarding the treatment and inspection of the mangoes and the orchards in which they were grown. The additional information collection activities include a preclearance workplan, trust fund agreement, compliance agreement, monitoring of inspections, orchard mutual agreement, irradiation treatment package labeling, recordkeeping, treatment certification, and denial and withdrawal certification. Failure to collect this information would greatly hinder APHIS' ability to ensure that mangoes from India are not carrying plant pests.

Description of Respondents: Business or other for-profit; Federal Government (Foreign)
