POLICY JUSTIFICATION

Taipei Economic and Cultural Representative Office in the United States—Refurbishment and Upgrades of EDA Oliver Perry Class Frigates (FFG-7)

The Taipei Economic and Cultural Representative Office in the United States has requested the possible sale, refurbishment, and upgrade of two (2) Oliver Hazard Perry Class Frigates (FFG-7) being provided as Excess Defense Articles (EDA). Each vessel will be equipped with the MK-92 Mod 6 Fire Control System, the SQQ-89V(9) Anti-Submarine Warfare System, the MK-75 76mm Gun System, Phalanx 20mm Close-In-Weapon System (CIWS) (Block I B), MK-13 Guided Missile Launching System (GMLS), AN/SLQ-32 Electronic Warfare System, SPS-49 Radar, SQR-19 Towed Array Sonar, SQS-56 Sonar, spare and repair parts, publications and technical documentation, personnel training and training equipment, provisioning, system integration, U.S. Government and contractor logistics, engineering, and technical support services, and other related elements of logistics and program support. The estimated cost is \$190 million.

This sale is consistent with United States law and policy as expressed in Public Law 96-8.

This proposed sale serves U.S. national, economic, and security interests by supporting the recipient's continuing efforts to modernize its armed forces and enhance its defensive capability. The proposed sale will help improve the security of the recipient and assist in maintaining political stability, military balance, and economic progress in the region.

The proposed sale will improve the recipient's capability in current and

future defensive efforts. The recipient will use these ships to replace existing Knox Class destroyers which have reached the end of their useful service life. The EDA Oliver Hazard Perry Class Frigates (FFG-7) will be more sustainable, provide increased Anti-Submarine Warfare (ASW) capability as a deterrent to local threats, require less maintenance, and reduce life cycle support costs. The recipient will have no difficulty absorbing these ships and equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be selected through a competitive procurement conducted by the U.S. Government in accordance with the Federal Acquisition Regulation. The purchaser normally requests industrial cooperation at forty percent, but at this time there are no known offset agreements proposed in connection with this potential sale.

Implementation of this sale will not require the assignment of any additional U.S. Government personnel or contractor representatives to the recipient.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 15-27

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Item No. vii

(vii) *Sensitivity of Technology:*

1. The equipment to be delivered with these Oliver Perry Class Frigates (FFG-7) is similar to the equipment currently on customer ships or in inventory. This includes Close-In-Weapon System (CIWS) (Block IB), MK 75 76mm gun, MK 13 Guided Missile Launching System (GMLS) for their STANDARD Missile (SM-1) and Harpoon Block II missiles. MK 32 SVTT is an over-the-side launching system for light weight torpedoes. The Link 11 system provides data sharing capability with other platforms. Operational performance characteristics for CIWS, Harpoon, and the MK 75 gun are classified SECRET. With the exception of CIWS IB and Harpoon Block II, all other equipment being provided in this program is considered legacy technology within the U.S. Navy.

2. The SQQ-89V(9) Anti-Submarine Warfare (ASW) system is being introduced to customer inventory through this program. This system represents an upgrade in capability for the customer, which will enhance the

recipient's ASW capabilities. The operating system software and operating manuals are both classified SECRET. Operational performance is classified SECRET. The technical and operational elements of this system, and any related data, are classified SECRET. The SQQ-89V(9) will result in the transfer of highly accurate ASW sensing and detection capability.

3. The technical and operational elements of these systems, and any related data, are classified to protect vulnerabilities, design and performance parameters, and similar critical information. Uncontrolled release of sensitive technological information on these systems could reveal capabilities and possible vulnerabilities.

4. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar advanced capabilities.

5. A determination has been made that the recipient can provide the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

6. All defense articles and services listed in this transmittal have been authorized for release and export to the recipient.

POLICY JUSTIFICATION

Taipei Economic and Cultural Representative Office in the United States- Follow-On Support

The Taipei Economic and Cultural Representative Office in the United States has requested a possible sale of follow-on life cycle support to maintain the Multifunctional Information Distribution Systems Low Volume Terminals (MIDS/LVT-1) and Joint Tactical Information Distribution Systems (JTIDS) previously procured.

The support will include spare and repair parts, support equipment, repair and return, publications and technical documentation, personnel training and training equipment, software and hardware updates, maintenance of a continental United States lab, U.S. Government and contracting engineering, logistics, and technical support services, and other related elements of program and logistics support. The estimated value is \$120 million.

This sale is consistent with United States law and policy as expressed in Public Law 96-8.

This proposed sale serves U.S. national, economic, and security interests by supporting the recipient's continuing efforts to modernize its armed forces and enhance its defensive capability. The proposed sale will help improve the security of the recipient and assist in maintaining political stability, military balance, and economic progress in the region.

The proposed sale will enhance the recipient's operational readiness and maintenance of its existing systems. The support will improve and integrate the recipient's information flow and display of tactical aircraft, surface ships, and ground stations. The recipient will have no difficulty absorbing this support and equipment into its inventory.

The proposed sale of this equipment and support will not significantly alter the basic military balance in the region.

The principal contractor will be selected through a competitive procurement conducted by the U.S. Government in accordance with the Federal Acquisition Regulation. The purchaser normally requests industrial cooperation at forty percent, but at this time there are no known offset

agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require multiple trips to the recipient involving U.S. Government and contractor representatives to participate in training, program management, and technical reviews.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
