Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* Idaho Power Company (IPC) filed a five-year compliance report for the project's approved land management plan as well as proposed updates to the existing plan. Updates include new land-use classification maps based off previously approved changes and modifications to the use classification of private boat docks on conservation and agriculture/grazing land. IPC proposes to change the classification of private boat docks to "conditional" in both conservation and agriculture/grazing land-use areas, which are currently listed as allowed and prohibited, respectively. To remain consistent across projects, IPC proposes the modification due to changes in land ownership and land use patterns from open-range grazing to private/rural-residential uses in the project area, as well as at this and several other IPC projects. IPC states that by listing private boat docks as conditional it would review all applications to ensure the proposal does not have adverse

resource effects. Additionally, all dock applications would be required to meet the IPC's existing boat dock standards and applicants would be required to obtain the required state and federal permits and consult with specified resource agencies.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street NE., Room 2A, Washington, DC 20426, or by calling (202) 502-8371.
