with its Alternate I & II and associated information collection from the NFS. Six comments were received in response to the proposed rule.

II. Discussion and Analysis

NASA reviewed the public comments received in the development of the final rule. The six comments received were advertisements for personal services from the same respondent and completely unrelated to the purpose of this rule. Therefore, no change was made to the final rule as a result of the public comments received.

III. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

IV. Regulatory Flexibility Act

A final regulatory flexibility analysis has been prepared consistent with the Regulatory Flexibility Act, 5 U.S.C. 601, et seq., and is summarized as follows:

The National Aeronautics and Space Administration (NASA) is issuing a final rule to amend the NASA FAR Supplement (NFS) to remove NFS clause 1852.243–70, Engineering Change Proposals (ECPs) basic clause with its Alternate I & II and associated information collection from the NFS because the NFS clause is no longer used in procurements and is duplicative to FAR requirements. NASA conducted a retrospective review of its regulations and determined NFS clause 1852.243–70 should be removed along with the corresponding information collection requirement OMB Control No. 2700–054. No changes were made to the final rule as a result of public comments received. Comments received in response to the proposed rule were advertisements for personal services and deemed out of scope.

NASA does not expect this final rule to have a significant economic impact on a substantial number of small entities.

**SUPPLEMENTARY INFORMATION:** NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

NMFS prohibited directed fishing for groundfish by vessels using trawl gear in the GOA, effective 1200 hours, A.l.t., October 22, 2016 (81 FR 74313) under § 679.21(d)(6)(i). That action was necessary because the annual prohibited species catch (PSC) limit for Pacific halibut specified for vessels using trawl gear in the GOA was reached.

As of October 25, 2016, NMFS has determined that approximately 250 metric tons of the trawl Pacific halibut PSC limit remains. Therefore, in accordance with § 679.25(a)(1)(i), (a)(2)(i)(C), and (a)(2)(iii)(D), and to fully utilize the 2016 groundfish total allowable catch, NMFS is terminating the previous closure and is opening directed fishing for groundfish by vessels using trawl gear in the GOA. The Administrator, Alaska Region (Regional Administrator) considered the following factors in reaching this decision: (1) The current harvest of Pacific halibut PSC in the trawl fishery the of the GOA and, (2) the harvest capacity and stated intent on future harvesting patterns of vessels in participating in this fishery.

**Classification**

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the opening of directed fishing for groundfish by vessels using trawl gear in the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of October 25, 2016.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Without this inseason adjustment, NMFS could not allow the trawl deep-water species fishery in the GOA to be harvested in an expedient manner and in accordance with the regulatory schedule. Under § 679.25(c)(2), interested persons are invited to submit written comments on this action to the above address until November 15, 2016.

This action is required by §§ 679.21 and 679.25 and is exempt from review under Executive Order 12866.

**Authority:** 16 U.S.C. 1801 et seq.

Dated: October 26, 2016.
