This information collection is to provide data to assess QIN–QIOs efforts aimed at addressing these HACs in nursing homes. QIN–QIOs are responsible for recruiting nursing homes to participate in the program. We will conduct an annual survey of administrators of nursing homes participating in the QIN–QIO program (intervention group) and administrators at nursing homes that are not participating in the QIN–QIO program (comparison group). Our proposed survey assesses progress towards the goals of the QIN–QIO SOW, including activities and strategies to increase mobility among residents, reduce infections, reduce use of inappropriate antipsychotic medication among long-term stay residents.

We plan to conduct qualitative interviews with nursing home administrators. This interview will supplement the Nursing Home Survey and provide more in-depth contextual information about the QIN–QIO program implementation within at nursing homes, including: (i) Their experience with, and perceived success of QIN–QIO collaboratives; (ii) their satisfaction with the QIN–QIO Collaborative and QIO support; (iii) perceived value and impact of QIO program; and (iv) drivers and barriers to QIN–QIO involvement and success.
