

conveyed land. The acquisition of the wetlands at Cooper Spur and the easement on the wetlands at Government Camp may therefore result in no net loss of wetlands.

(3) A cultural and heritage resource survey was conducted on the Federal parcel. The survey revealed the potential for an adverse effect to a site of archaeological/cultural interest. Mitigation measures will be developed with Tribal and State Historic Preservation Officer (SHPO) consultation.

(4) Trails 755, 755A, and 755B cross the Federal parcels. A trail easement has been congressionally mandated so that non-motorized users would continue to be able to use the trails to get to Federal land, so that roads, utilities, and infrastructure facilities could be built across the trails, and to allow for improvement or relocation of the trails so that development of the conveyed parcels could occur. While the trails (or relocated trails) would still exist, the recreation experience could be negatively impacted by new development (such as buildings and parking lots) or the presence of new infrastructure.

#### Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, however.
