SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled “Nonallergic Rhinitis: Developing Drug Products for Treatment.” The purpose of this draft guidance is to assist applicants in the development of drug and biological products for the treatment of NAR.

The nomenclature and understanding of the pathophysiology of NAR continue to evolve. The recommendations in this guidance are based on the Agency’s current understanding of the definition of NAR and an assessment of issues raised by the presumed heterogeneity of NAR. The guidance discusses issues regarding the definition of a clinical phenotype, trial design, efficacy, and safety for new products under development.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on developing drug products for the treatment of NAR. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. The Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR part 312 have been approved under OMB control number 0910–0014.

III. Electronic Access
